BERBACH & SON, Druggists and Pharmacists. 12 SOUTH MAIN ST., ANN ARBOR.

Abstracts of Titles. Parties who are desirous of ascertaining the status of the title to their lands.

A Great Discovery. There is living near Kalamazoo, Pa., in a heavy old age, the man who has discovered how to make iron.

THE "Masher." Down the Baltimore and Ohio to New York, was a correspondent of the Cincinnati Enquirer.

Genius and Drunkenness. We read every day in our exchanges that some man has died from intemperance who was unusually capable in his particular line.

ITEMS OF INTEREST. A good smoker is an absolute essential implement in every apary.

TEA-TASTERS. A circle of tea-cups is placed along the edge of large tables with round revolving tops.

AN ODDIOUS TELEPHONE. Strange stories reach us from India of the feats performed by a native mesmerizer, named Buni.

AN INDIAN MESMERIZER. Strange stories reach us from India of the feats performed by a native mesmerizer, named Buni.

POULTRY AND HAY. Some enthusiastic poultry fanciers claim, with considerable flourish of speech, that the poultry interest of the United States is greater.

SCIENTIFIC SUICIDE. "Am a miserable man," said Cyrus Maddox, gloomily, "and it is best that the world should be rid of my presence."

THE NORTHEASTERN LUMBERMAN. The following manner of staining pine to represent black walnut is put in the market.

DEMOCRATIC STATE CONVENTION.

The Democratic State Convention, to appoint delegates to the national convention, to nominate candidates for President and Vice-President, and to select a State Central Committee, will be held at East Saginaw, on Tuesday, the 23rd day of June, at 1 o'clock in the afternoon. The question "whether it is desirable to continue the two-thirds rule longer in force in National Conventions," will likewise be before said Convention, the last National Convention having desired the State Convention to instruct delegates to the Convention of 1884 in regard to it.

Each County will be entitled to six delegates for each Representative to which, under the last appointment, it is entitled in the lower branch of the State Legislature, but each organized county will be entitled to at least one delegate to county, except those of the Upper Peninsula, which will be represented by delegates not residing in the county.

All citizens of the State, irrespective of party politics, associations or differences, who can unite with us in an effort for pure, economical and constitutional government, and in the promotion of the common interests, are cordially invited to join in sending delegates to this convention.

O. M. BARNES, Chairman,
WILLIAM BRODIE, Secretary.

A dispatch appears in Monday morning's papers announcing that Gen. Grant will not decline. Who supposed he would. He never was known to decline anything from a bull pup to a private residence.

Following the lead of the News the Free Press last week gave Judge Fields a presidential boom. A few days after a poll of the California convention it was found to have admirers among three hundred and forty delegates. Our cotems had better retire from the boom business for a while.

Governor Cornell recognizes the power of the press of New York. Not long since he appointed Mr. Fairman of the Elmira Advertiser superintendent of the insurance department. Last week he sent to the senate the names of John A. Place, editor of the Oswego Times for canal auditor, and Moses Summers, editor of Syracuse Standard for port warden of N. Y. Place was bounced from the custom house by Hayes.

Logan's convention carried things with a high hand at Springfield and instructed the 42 delegates to vote as a unit for Grant. The usual order of electing national delegates by congressional districts was overruled and a committee appointed by chairman Raum (Grant) selected them and ratification by the convention followed. It required three days for Logan to conquer the opposition and he did it most effectually.

The following extract from the Free Press may properly apply to Cincinnati, but there is no reason to believe it has an Ann Arbor application:
There must have been some very fervid talking at the Cincinnati musical festival, last week, for the Commercial rebuked those guilty of it in the editorial type. It said they advertised their ill-breeding and are at once classified with boorish ignoramus, by persons of culture, in common politeness. We are not certain whether persons of culture can in common politeness rebuke anybody as "boorish ignoramus," though the temptation in this instance is, it must be confessed, very strong.

There is an unpleasant predicament our esteemed contemporary the Register is liable to get into in the ensuing campaign. A Blaine paper and hence anti-third term, it is very liable to be called on to support Grant. Any one who knows it at all understands it hates Mr. Beal as the d—l hates holy water. Now, Grant nominated for Register, being a Republican paper and expected to support regularly nominated candidates, can not contemplate the coming campaign with an infinite degree of complacency.

Bro. Beal is fitting about the state as we read and hear, working up his gubernatorial boom. Don Henderson of the Allegan Tribune says Tom Palmer will be nominated on the first ballot. This being true the track to the executive mansion of Michigan looks dusty and beset with danger to the ambition of our fellow citizen. Perhaps Bro. Beal is a candidate to crowd out Childs who has the congressional bee buzzing in his ear, on the theory that Washburn in asking for the gubernatorial candidacy ought in all modesty not to ask for more. We venture the prediction that her delegates to the congressional convention are already bargained away to a candidate in another county in consideration of support for our local would-be governor.

GREATEST REMEDY OF THE AGE.
THE GRANT RESTORER.
FOR MANKIND IN GENERAL.
A Universal Polioptic Panacea.
U. S. G.—1880—PREP'D.

This Best preparation ever devised for those disorders which so apt to appear during the Election season—such as:
Presidential Fevers—Cabinet Eruptions—Sore heads—Chill Blisters—Foreign Missions—Measles—Ring Worms—Skin Subuldes—Congressional Grabs—Crooked Whiskers—High Liver Complaints—Swellings of the Pocket—Portery of the Excisequer, and in short, for all the ills Political Flesh is heir to, including Ill Luck.

Read the following testimonials:
"I got it."—(E. B. Washburn.)
"I have tried it with satisfaction."—(Tom Murphy.)
"We all need it."—(John A. Logan.)
"I'm looking after more of it."—(C. A. Arthur.)
"It's the most desirable thing."—(O. E. Babcock.)
"It has been successfully used in my family."—(A. G. Catell.)
"There is nothing like it."—(E. W. Stoughton.)
"Children cry for it."—(G. W. Childs.)
"No family should be without it."—(Solomon Cameron.)
"I have taken it from childhood."—(Col. E. D. Grant.)
"I recommend it for the Navy."—(Ex-Secretary G. M. Robeson.)
"Good thing to take with you on a voyage."—(Parson Newman.)
"Can speak favorably from experience."—(Ex-Secretary Belknap.)
"Just my style."—(Ex-General Reno.)
"For further testimonials see the Directory."
— ONE NOTE.
Put up by CAMERON & CKLING, Congressionally Druggists,
And for sale by THE TRADE GENERALLY.
(From Puck.)

Michigan.
—Grand Rapids gets \$23,545 from the liquor tax.
—The Adids divorce case is again furnishing Grand Rapids gossipers with pleasing morsels.
—The Phoenix furniture company of Grand Rapids employs 627 mechanics and will soon increase this number to nearly 700.

—During the month of April over three thousand acres of state land were taken up in Alpena county, the most of it by actual settlers.
—Ed. Hoskins, a young man who lived in Onondaga, Eaton Co., was found dead in the woods. Supposed to have been poisoned by poisoning.
—Mrs. Bolinger, of Point St. Ignace, while going to see a neighbor, was overtaken by a storm, and in her anxiety to protect her babe she covered it so closely that it smothered.

—Because of the inadequacy of the government building at Detroit, erected twenty years ago, the United States now pays rents of \$5,488 yearly for extra accommodations, and the demand is urgently pressed on congress for an appropriation and a new building.
—A German blacksmith named Marcus Thede, of East Saginaw, who has resided in that city twelve or fifteen years, was found Monday morning about 5:30 o'clock dead in the woods at his residence on Fourth street. A pistol lay near him and a bullet had been shot through his head.
—Some members of a Detroit family brought in from the woods what they thought was a "pretty vine," and set it out in the front yard. When the servant-girl saw it, at a distance, she exclaimed that it was poison ivy, and that she was already poisoned by merely looking on it. Sure enough, the signs of ivy poison appeared on her in a few days, though the vine had been already uprooted and destroyed.

—Grand Rapids Editor, Mr. William Gage, a farmer who lives in Nelson township, came to the city to-day with his daughter, Etta, a young lady 17 years old, to secure medical treatment for her. Mr. Gage says that on the 16th of last November Miss Etta, while sewing, accidentally cut one of her fingers slightly and fainted away, becoming unconscious or crazy, and has been ill and insane at intervals much of the time since. One of the very strange complications of her malady is a bronchial cough which sounds much like the barking of a dog, and led to the report that she was afflicted with rabies from the bite of a mad dog a long time ago. Her father says he never was bitten by a dog or any other animal, and though her disease is peculiar, it does not occur from such causes. The strange case of her malady has caused many of our doctors to visit her.

General News.
—There are seven colored lawyers in Boston.
—Speaker Randall's mother died the other day.
—Henry S. Foote, superintendent of the New Orleans mint, died a poor man.
—Rev. Dr. Peltz tried for adultery at Jamestown, N. Y., was acquitted Saturday.
—The Tennessee greenback convention resolved to repudiate nearly all the state debt.

—Hayes has turned the white house billiard room constructed by Grant into a conservatory.
—Immigrants landed at Castle Garden, New York, May 1, 30,429.
—The failure of the Philadelphia and Reading Coal and Iron Co., for \$120,000, 000 is the latest sensation in financial circles.
—John Tillotson a member of the Chicago Board of Trade shot himself because his pretty wife left him and entered a house of ill-fame.
—Tom Boyd, the new Sam Patch jumped from the suspension bridge at Cincinnati into the river, Sunday afternoon, receiving no injuries.
—Rev. Mr. Adams of Rochester, N. Y., an Auburn Theological (Presbyterian) Seminary graduate, created a local sensation the other day by denouncing orthodoxy from the pulpit.

—Congressman Acken, who was defeated for nomination by a recent man, is now in Louisiana endeavoring to secure another convention, claiming that the one in which he was beaten was irregular.
—The following call signed by about twenty leading clergymen of New York and Brooklyn, is published: "In view of the fact that the nominating conventions of the political parties in June next will designate those citizens to whom the choice of the people for a chief magistrate of the United States for four years next ensuing, will be confined, the signers ask their brethren of all denominations to unite with them in holding Sunday, the 30th day of May, a special occasion of prayer to Almighty God that he will vouchsafe to guide and direct these assemblies in the choice of men fit for the suffrages of the people."

A London lady, on her way to Bond street, was accosted by a middle-aged, well-dressed man, who, after some conversation, requested the lady to come and dine with him at a cafe which he named. She at once consented, when he instantly hailed a cab, opened the door himself, and requested the lady to step in. She made some excuse, and requested him to get into the cab first. On his doing so she shut the door on him, and called out to the driver: "Drive this gentleman to a police station as quickly as possible."

A little child had a wonderful escape from drowning at Manchester, England. Its mother, in a fit of desperation induced by the desertion of her husband, intended to destroy her infant and babe, and chose the waters of the canal as a sure and easy "ferny over." She tossed her little one into the water and jumped after, but the child came to the surface and flailed on its back with the eas of a gnat, and the foolish mother was fished out in time to express in a police court her disgust with exceptions to natural laws.

The Honorable Billy, out shooting the other day, fired into a hedge. There was a howl, and a country bumpkin suddenly appeared rubbing his eyes. "Are you hurt?" "Hurt? I've fifty shots in me, if I've one. I'll have the law on you," "Don't do that!" pleaded Billy; "I'll give you half a crown for every shot we can find in the hedge, and the doctor here made an examination. There were but two shots that had pierced the skin. You should have seen the good fellow's expression as he pocketed the five bob. 'Is that all?' he said. 'Just my luck.'"—*Judy.*

WIT AND HUMOR.

Aworn on the tree is worth two on the foot.
How many eggs can a Frenchman eat? One, because one egg is *un œuf* (enough).
"What is home without a wife?"—*Yonkers Gazette.* A boarding-house, generally.

A lady generally appears at a party in a loose-necked dress, and a gentleman in a dress necktie.
"Tennyson loves to dance."—*Dayton Democrat.* Then let him hop out of bed some morning and light on a tack.
When two funerals meet at the cemetery, it is embarrassing to have one under the call to the other, "How's business?"
It was said of an inveterate drunkard that he had met with a great affliction, and drank to drown his grief. "Then," said a bystander, "his grief must know how to drown."

A new instrument, called the sphygmograph, consists in an application of the rubber tube, by which the pulsations of the articular pulse are converted into audible sounds. By extending the telephone wires in connection with the instrument, a physician may listen to the pulse of a patient a mile or two away.
A new sphere of usefulness for the superabundant product of the oil wells is said to be included in a discovery by which a superior quality of refined iron can be produced from common scrap iron. Either crude or refined iron may be employed, and the process by which the iron is made, is known as the oil fuel process.

Cellulose is now employed to considerable extent in the manufacture of eye glass frames which are said to be much lighter than any others, twenty-five per cent lighter than the glass, also stronger and more durable. They can be dropped on the hardest substances without injury. Their beauty is equal to that of tortoise shell, and not being affected by atmospheric changes, they are adapted to any climate.
Experiments have recently been made at Colli's factory at Hartford, on a new substitute for steam boilers, particularly adapted for use in pleasure yachts and small crafts generally. It is an apparatus of self-acting apparatus furnishing great propelling force in a little space. The steam generating apparatus weighs only 350 pounds and the engine only 400 pounds. The water supply is fed back to the boiler and is used over again.

It has been supposed that gimlet pointed screws were a modern invention, but some were recently taken from a piano at Worcester which were made in London in 1755. They bore unmistakable evidences of age, and of having been made before screws were turned out by machinery. The most curious thing about the matter is that they did not at once supersede the blunt pointed screws which continued in use until nearly a century later.
A new process for making artificial stone, patented by Terrikoff, is thus described in *Le Monde de la Science*: A mortar consisting of equal parts of lime and sand is exposed for a few hours to a temperature of 70 degrees below zero, the heat of the water vapor. The paste having been taken out of the furnace is now passed under the cylinders of a machine like that used for molding bricks, and it comes out in the form of a brick, which is left to cool in the air, becomes dry and hard. In the course of eight or nine hours these cubes are as hard as good building stones, and are fit for use. This artificial stone is, in fact, a sort of brick of mortar laid at a low temperature, and the cost, too, is about the same as that of bricks.

Household.
Turpentine will remove ink from white woodwork.
A solution of cyanide of potassium is the best poison to kill insects of any kind.
A pint of mustard seed put in a barrel of cider will preserve it sweet for several months.
A small spray of wormwood, if placed in the kitchen, will, it is said, destroy or drive away ants.
A mixture of oil and ink is first used to clean kid boots with, the first softens and the latter blackens them.
A small teaspoonful of molasses added to buckwheat batter each morning will make the cakes temptingly brown.
It may be laid down as a rule that all plants of whatever kind, if cut down and used as manure, impart more nutriment to the earth than they take from it.

A Smart One.
The boys tell a pretty good one down at Corning, N. Y., about a young fellow in commercial life named Blake. He was in the hardware line. One day, when the boss was at dinner, a customer came in to buy some nuts. He found an article that suited him, and wanted a dozen. Young Blake looked at the price list and found they were listed at 25 cents a dozen. "30 cents," he called out, and a low, inverted whistle, and then, with a sudden inspiration, he handed the customer 5 cents and told him he could buy the nuts at the other store. "By George," he said, when he was telling the boss of the Russian laughing, "I thought the best thing I could do was to save the nuts anyhow."

A Great Swamp Reclaimed.
A correspondent of the New York Times, writing from Goschen, N. Y., tells how 800 acres of pestiferous marsh east of that village have been converted into the richest of farm land through the wisdom of one man. The reclaimed swamp is crossed by the Erie Railway, and the tract contains serious obstacles encountered by its engineers. To construct a foundation for the road bed it was necessary to drive a multitude of piles to the depth of 100 feet, and connect them with hundreds of thousands of loads of stone and dirt; the building of one mile of road across the swamp costing more than any other five miles of the road from Jersey City to Piermont.
Twenty years ago a farmer conceived the idea of draining a portion of the tract and making it tillable soil. By ditching he reclaimed 60 acres. His first acre he bought cost him \$1. When the next day the ditch was dug, it left as a soil the finest of black mud composed almost entirely of vegetable mould, the price advanced to \$17 an acre. After the 60 acres were reclaimed, the price advanced to \$1,000 an acre, until the day as high as \$1,000 has been paid for the reclaimed land. The railing price is \$500 an acre. The great value of the land is owing to its extraordinary adaptability to the culture of onions. A crop of 800 bushels of onions to the acre is not uncommon, and the Graycock onion meadows are celebrated throughout the country, about 300 acres are under cultivation this year, and the success of the onion business in the meadows has led to the reclaiming of similar lands in other parts of the country. The \$1 price received by onion raisers is a find. The average yield is 300 bushels to the acre. The crop is almost invariably sold for cash as soon as it is ready for market, and as it matures early in the season it is a very loved abundant thing to keep his land in the condition necessary to its productivity.

Scientific Notes.

A new iron railroad tie has been on exhibition recently in Philadelphia, which dispenses with the use of spikes, nuts or other fastenings with the drilling and punching of rails, and avoids the consequent dangers of weakening or fracture from such causes.
Autotypes, made by a new process of photo-engraving, are fine pictures, having the accuracy, the infinite detail, the perfect definition, the brilliant effects of the best photographs, with the added advantage of being permanent—as enduring as paper and ink can be.
Experiments recently made in Hungary with a preparation called *cellulose* have been regarded as very satisfactory. It keeps with a perfectly dry and in good preservation for an indefinite time, and will, it is claimed, have an important influence in increasing the export of Hungarian and other wines.

A new instrument, called the sphygmograph, consists in an application of the rubber tube, by which the pulsations of the articular pulse are converted into audible sounds. By extending the telephone wires in connection with the instrument, a physician may listen to the pulse of a patient a mile or two away.
A new sphere of usefulness for the superabundant product of the oil wells is said to be included in a discovery by which a superior quality of refined iron can be produced from common scrap iron. Either crude or refined iron may be employed, and the process by which the iron is made, is known as the oil fuel process.

Cellulose is now employed to considerable extent in the manufacture of eye glass frames which are said to be much lighter than any others, twenty-five per cent lighter than the glass, also stronger and more durable. The Wire Age.

Whenever in walking or riding through the streets of our great cities and towns, the eye is directed upward, a perfect network of wire is seen stretching from building to building.

Cake—Two eggs, one and a half cups of sugar, a piece of butter the size of an egg, one cup of sour cream, one teaspoonful of saleratus dissolved in three cups of boiling water.

The following liniment is said to be useful for rheumatism, lumbago, sprains, bruises, unbroken chilblains, etc.

Biscuits.—For this rather indigestible, though rather palatable compound, take two cups of buttermilk and one of thick sour cream.

Turkish Soup.—This soup owes its name to the fact that it is made in the East.

A Large Royal Family. There are at present in Europe seven hundred and fifty monarchs.

After the Butter Comes. At the churn comes in our most rational need of reform.

The wife of a Norman peasant is ill. A physician is called in. "Will you please," asks the mistress, "tell me, Monsieur," says the doctor, "holding up five loaves, kill her or cure her, these are yours."

A young editor of Avondale, O., describes his experiences and what he has learned from his own mistakes.

Observations of snow collected on mountain tops, and within the Arctic Circle, far beyond the influence of factories and smoke, confirm the supposition that minute particles of iron float in the atmosphere.

Meteorite Iron in Snow. Observations of snow collected on mountain tops, and within the Arctic Circle, far beyond the influence of factories and smoke, confirm the supposition that minute particles of iron float in the atmosphere.

The first American patent for an invention was issued to Samuel Hopkins, of New York, July 21, 1790, and was for an improved method of making persulfate and potash.

Professor Nordenskjold, who examined snow in the far north, beyond Spitzbergen, says that he found in it exceedingly minute particles of metallic iron, cobalt, and nickel.
