mocracy has clearly defined its principles or two important phases. They say the troops can be called upon any day in the year to quell riot and insurrection, save the day when the nation chooses its rulers, and then mob law and violence may run rampant unless the executive of the states choose to call in the aid of the troops. But if Mis-sissippi or Louisiana chance to have a close

election on hand and it is necessary to kill a few negroes or hang a few white men, and the executive be willing, then the state shall be supreme in the matter and proceed to make its own majority at the ballot box and in its favorite method. Thus the old question comes up again at every election. Democracy insists that this nation is a confederacy of states where the state is supreme, and republicanism declaring that we are "A Nation and not a League. question is the real live issue between the old parties and will come into plainer light than ever during the coming campaign Republicans, how shall it be decided? Speaking of the temperance element in politics the Lansing Republican save ine temperance reform appears likely to be an element in politics this year to a great-

er extent than usual, but it will influence the nominations of candidates by the old parties rather than tend to the organization of a new party. A majority of the temperance men of the country are republicans. and the democratic party is more congenia to the whisky interests. An organization of the latter in Michigan boasts that it has raised \$12,000 as the beginning of a fund with which to fight the next campaign. It proposes first to secure the nomination by both parties of men who will favor a reduction of the tax and a relaxation of the penalties under the existing law; but where pledges cannot be obtained, then it will support those men who come the nearest to whisky views. In other words, an insidious attempt is to be made to capture as many candidates as possible on both tickets, because the open announcement of a free-whisky platform and ticket would insure tremendous defeat. The temperance cause has deep root in the hearts of the people, especially the young voters who have received fresh education for the last three years. It behooves republicans to watch most carefully all their nominations, and

see that no men are placed on our ticket excepting those of firm principles, temperate habits, and practical sympathy with the reform. The records of candidates will be rigidly searched in this matter.' Among the live, wide-awake journals, of northern Michigan is the Charlevoix Sen-tinel, published and edited by Willard A.

Smith, which closed its 11th volume with the issue of April 27th. The following from its columns, respecting the event, would in dicate that the peeple of that county appre ciate a good paper: "It steps from the old volume into the new, stronger than ever in the elements which go to make up a successful journal. With a largely increased subscription list over that of one year ago, a material increase in advertising patronage, and the addition of a large amount of the material necessary to successfully prosecute its business, the Sentinel bids defi ance to any or all contingent circumstances, except, of course, the destroying elements. We have a first class office, unincumbered, a large and increasing circulation, the mos extensive job business of any paper north of Traverse City, and, we flatter ourself, as promising an outlook, as any of our contem-poraries in northern Michigan. All this, we think, the Sentinel has earned. earned it as truly as the laborer with toil and sweat, earns his daily stipend. For over a decade our journal has stood upon the walls and heralded the superior attrac tions of the Pine Lake region. It has fought the battles of this region when to fight was to bleed."

At that time Mount Adams, as it is now called, was a favorite resort for wild turkeys, pheasants, squirrel, rabbit, and other small game. They are very tender of the university just now fearing it will suffer loss in not following their wishes and behests, and that some one is going to run up a bill of costs which will be saddled upon the university instead of themselves. There must be some good reason why Douglas & Co. feel such a sense of safety and such an immunity from these terrible costs, and why the university is in such great danger. Will some one inside the ring, or source from which they get their assurance in form us what it is?

#### TOO MUCH BOOM.

The iron boom, it seems, was too much of a boom. Iron has declined, considerably, both pig and manufactured, and further declines are looked for. While a reasonable rise, consistent with the demands of trade, would have been a good thing for the country as well as the manufacturers, the thing was pushed too fast. One great trouble with manufacturers in this country is they are not satisfied with reasonable profits and sales; but if they see a possible opportunity will force the market completely beyond the requirements, and consequently a reaction sets in. In this reaction the people generally are effected, the same as they are in a rising or active market. And not alone in the iron trade has the market been forced beyond the demand. Woolen goods in certain departments, carpets especially, have gone back to war and inflation prices. Glass jumped up suddenly, and numerous things, not necessary to mention. The consequence must be that a decline will set in. The market should have been allowed to than no loaf," and that to control an evil rise gradually and then it would have been | which all law has so far failed to suppress, upon a solid footing. The county organized in 1870 with a population of 738. At the last census in 1878, it was 11,291. A low estimate of its present population would be 20,000. It can boast of 90 school houses and not a saloon. About one-half of its population consists of Russians, the most of them being known as "Mennonites," so called from their belief in a priest named Meno. Music, both vocal and instrumental, was furnished by Mr. Nathan White and daughters, while the usual beautiful display of

flowers was made by Mr. Toms. "Injurious insects," was the subject under discussion. Mr. Baldwin stated that London manufacturers had sent him circulars respecting London purple, as a substitute for Paris green for the destruction of insects, which he thought a preferable article, and much cheaper. Used the same as

An article giving the views of Prof. A. J. Cook upon the coddling moth, was read by the secretary, in which he recommended the keeping of swine in the orchards and

J. W. Wing said that the building of little fires he knew by actual experience to be effectual in destroying insects. His attention was first called to this method by a lime kiln, the fires at night attracting myriads of insects, and ever since he had burned lime his orchards were free from insects. The birds are of incalculable service in rid ding the country of these little pests, and are worthy of our tenderest sympathy and closest protection. He also thought the keeping of swine in orchards a good thing; at least some kind of domestic animals should be kept there to eat up the wormy fruit,

Judge P. L. Page agreed with the former neaker that little fires were valuable as too much work to be carried out by the like splinters, scarcely a building in town es- people generally. He thought all hunting upon the premises of farmers should be forbidden, as it tended to drive off the birds. The law is stringent in this respect, and it is the duty of the people to enforce it. Notices should be posted up on the premises of farmers forbidding these depredators on the grounds; and if moral suasion has no effect, then take advantage of the law and

Mr. Baldwin said that the birds would bring forth insects from underneath the bands on trees with wonderful ingenuity. Mr. Dorr gave his experience, and highly

He reiterated the importance of the birds. He also thought fowls in orchards a capital idea, and stated that he kept 100 white leghorns for that purpose. HONOR FROM EUROPE. It is conceded on all sides that Dr. Ayer's Pills are above comparison with other medicines. Uniting the best elements known to the chemist, they are particularly effective against the numerous stomachic disorders for which they are reccommended as a cure. These pills are so mild, yet searching, that they are often prescribed by doctors who otherwise do not favor patent medicines. Indeed, with the fruits of Dr. Ayer's genius in the shape of Pills, Sarsaparilla, Ague Cure, and Cherry Pectoral, one might with impunity travel through tropical America, or follow Stanley on his travels through the interior of

Orville E. Hoyt has sold the Dexter Leader to Rev. D. Edgar, formerly of Tecumseh, who took possession last Saturday. Mr. Hoyt has made the Leader a readable journal, infusing energy and good sense into its columns, and it is to be regretted that change of climate is absolutely necessary. The best wish we can give Mr. Edgar is that the Leader may keep up to its already excellent standard.

We are glad to notice that a policeman has been appointed to serve at the opera house. The gang of boys, rowdys, and roughs who fill up the galleries and insult every respectable person in the audience by hooting, cat-ealls, whistling, hissing, and in various other ways, ought to be made to respect the feelings of others, in some way. A good policeman, as Mr. Imus will undoubtedly be, will have a quieting effect on this rowdy element.

Three stout fellows have been about our streets for the last few days with a wagon and horses, buying rags. They are very certs. careful to visit places where women only are at home, and make fair offers, but always ask if the rags have been weighed. They do their own weighing outside, and make out that 20, and 40 pounds are only five or seven. After the rags are in their posses the ill-health of his wife is such that a sion they will only pay in tinware or some thing of the kind, and that of the poorest quality. One girl who had saved about 40 pounds, and intended paying her fare to Ypsilanti and return out of them, was told that her rags weighed only five pounds, and she was given a tin cup in exchange. These men are imposing on the people of this county, and taking advantage of the helpless women and need publishing. They camp in the outskirts of the city, and probably add pilfering to the rest. They are hard looking cases, and consist of two men and a boy of 15, with a span of black horses. Look out for them. They seem to be going through the city systematically, baving certain signs that they chalk upon the gate or sidewalks where they have operated.

### SIGNS OF CATARRH.

No other such loathsome, treacherons and under-mining malady curses mankind. One-fifth of our Children die of diseases generated by its Infectious Poison, and one-fourth of living men and women drag out miserable existences from the same cause. While asleep, the impurities in the nostrils are necessarily swallowed into the stomach and inhaled into the lungs to poison every part of the system.

Dr. Wei De Meyer's Catarrh Cure absorbs the purulent virus, and kills the seeds of poison in the farthest parts of the system. As manufacturers of Animal Charcoal, we have at our hands the mos valuable material used in making fertilizers, viz.; Bone Black Dust. This fer tillizing substance contains 30 per cent. of phosphate of lime against fifty-five per cent. contained in raw bones, and its well known value commands so high a price in European markets that but very few manufacturers of fertilizers in this country use it. Although the HOMESTEAD Fertilizer costs us more to manufacture than if prepared of the materials generally used, we shall continue its present high standard, and place on the market a genuine, pure Bone Black Phosphate.

ing mose difference than the netd win average, the phosphate will do on very poor soil. This was cut from a very poor spot, but each had the same chance with the one exception. It was cut 12th o June, shows the earliness of that fertilized. I have the best piece of barley in this section—100 lbs. superphosphate per acre sown on wheat stubble. The best farmers here are taking note of these things. Very truly, F. J. GROAT.

MEDINA, Orleans Co., N. Y., August 7th, 1879.

Michigan Carbon Works:

GENTLEMEN:—Enclosed please find photograph of some barley.

This barley was grown on A. H. Poler's farm, four miles south of Medina,

Orleans Co., N. Y. Orleans Co., N. Y.

I made a frame four feet square and set it in the standing grain on the day of its being cut. I then cut and gathered all that stood within the frame of each, where there was phosphate and where there was no phosphate. I let it lay in the sun one day to cure, then weighed each bundle as you see it.

ACTUAL RESULTS AT OUR SEED FARM ON LETTUCE SEED. 

D. M. FERRY & CO. Send for Circulars giving full reports of results, and all particulars in regard to use. In places where we have no authorized agent, a barrel of 200 lbs. will be sent ODORLESS FLORALIS.

Prepared Expressly for Lawns, Flower Gardens, Pot and House Plants.

DIRECTIONS.—Use three tablespoonfuls of the manure to a gallon of water. Steep twelve hours before using, and keep well stirred while being applied. Do not apply oftener than once in two weeks.
