DON'T TAKE IT TO HEART.

There's many a trouble
Would break like a bubble,
And into the waters of Lethe depart,
Did not we rehearse it,
And tenderly nurse it,
And give it a permanent place in the heart.

There's many a sorrow
Would vanish to-morrow,
Were we but willing to furnish the wings;
So sadly intruding,
And quietly brooding,
It hatches out all sorts of horrible things.

Resolved to be merry,
All worry to ferry
Across the famed waters that bid us forget,

Out of the window she leaned and laughed,

A girl's laugh, idle and foolish and sweet foolish and idle, it dropped like a call,
Into the crowded, noisy street.

And in a moment passing there— And into her idle, empty day, all in that moment something new Suddenly seemed to find its way.

And no longer fearful,
But happy and cheerful,
We feel life has much that's worth living for yet.

OUT OF THE WINDOW.

Up he glanced at the glancing face,
Who had caught the laugh as it fluttered and fell.
And eye to eye for a moment there
They held-each other as if by a spell.

And through and through the clamerous hours That made his clamerous, busy day, A girl's laugh, idle and foolish and sweet, Into every bargain found its way.

And through and through the crowd of the streets
At every window in passing by,
He looked a moment and seemed to see
A pair of eyes like the morning sky.

A TALE BY MARK TWAIN.

A Clever Satire on Some of the Current Sentimentality.

The new Atlantic contains the tale of Edward Mills and George Benton by Mark Twain, which is as clever a satire on the sentimentality over crime as that sort of gush has received. Edward Mills minded from boyhood, George Benton never did. Edward prospered. George always had to be helped. They had the same adopted parents, who left all the property to George because Edward could take care of himself. So it went in all things, even the girl that Edward was engaged to dropped him, as it was her duty to save George. Hard times threw Edward out of regular work, and he relapsed to common labor a while; but George became a flourishing drunkard. We give the last part of the story: A grand temperance revival was got up,

There was an eloquent pause, and then George Ben-ton, escorted by a red-sashed detachment of the ladies of the refuge, stepped forward upon the platform and signed the pledge. The air was rent with applause, and everybody cried for joy. Everybody wrung the hand of the new convert when the meeting was over, his salary was enlarged next day; he was the talk of the

town, and its hero. An account of it was published. George Benton fell, regularly, every The pastor hesitated. This was not what he had looked for at all.

"Of course—of course," said he. "But how does it happen, Sarah, that you are at home again so soon?"

"Of course—of course," said he. "But home again so soon?"

When, at the end of a year, the tireless efforts of the benevolent ens, uttered its shrill, clear vesper note; and Mr. Caryl, walking home through the Westbrook woods, thought what a beautiful world this was that God had made.

Mr. Caryl was only 24, and had been in the Westbrook parish for three months.

The detectives hunted down the criminals; the chief one proved to be George Benton. A wide sympathy was felt for the widow and orphans of the dead man, and all the newspapers in the land begged that all the banks in the land would testify their appreciation of the fidelity and hero ism of the murdered cashier by coming forward with a generous contribution in aid of the family now bereft of support The result was a mass of solid cash, amounting to upwards of \$500—an average of nearly three-eights of a cent for each bank in the Union. The cashier's own bank testified its gratitude by endeavoring to show (but humiliatingly failed in it) that the peerless servant's accounts were not

Everything that money and in-fluence could do was done to save him, but it all failed; he was sentenced to death. Straightway the governor was besieged with petitions for commutation or pardon; they were brought by tearful young girls, by sorrowful old maids, by deputations of pathetic widows, by shoals of impressive orphans. But no, the governor-for once

would not yield. Now, George Benton experienced religion. The glad news flew all around. OUR THANKS.

As is doubtless very well known to many of our readers our name figured somewhat conspicuously as a candidate for gubernatorial honors at the recent state convention at Jackson, and although not successful, we feel proud of the several delegations from this congressional district, and those also from other portions of the State, who stood by us so gallantly as long as there was any hope, and to them for their persevering efforts in our behalf we return hearty and sin-

Numerous friends, also, from this city and county, and from other sections of the state, were upon the grounds using all honorable endeavors to effect the desired end, and to them also, we return thanks. We feel very grateful for these expressions of confidence and friendship, and they go far toward turning defeat into victory.

It is unnecessary for us to say that we heartily support the successful candidate, and that our earnest efforts in behalf of the entire state ticket can be fully relied upon.

NOTES EDITORIAL.

Democratic journals should get their buckets of mud ready to bedaub Gov. Blair, now that he has returned to the old party. "Gen. Hancock will get a heavy soldiers

vote," says an exchange. Yes, but they will nearly all come from rebel soldiers. If it be true, as the democrats assert, that a political change in the country is necessary, will they please inform an anxious public why?

Hon. J. C. Burrows in the 4th congressional district, Hon. R. G. Horr in the 8th, and Hon. Jay A. Hubbell, in the 9th, have been renominated by the conventions of their respective districts.

Watterson, of the Louisville Courier-Journal, refuses to join the mud-slingers, and says of Garfield, "he is a kindly man, and a man I am persuaded who would not do a dishonest thing for his own sake, or its

own sake." After taking 256 ballots in the 6th con gressional district convention, held at Owosso last Wednesday and Thursday, Gen. Oliver L. Spalding, of Clinton, received the nomination by acclamation, all of the regular aspirants withdrawing their names. It was a happy outcome of a pro-

longed struggle. Gen. Jas. B. Weaver, the greenback candidate for the presidency, coming up from a campaigning tour through Alabama and the south, says that one-half the truth respecting the bull-dozing and proscription for political sentiment in that section has not been told. This is not from republican sources, Mr. Democrats; will you believe it

8. Resolved, That the ticket for state officers this day nominated is confidently commended to the electors of Michigan as one eminently worthy of their support.

9. The Republicans of Michigan recognize in James Abram Garfield, our nominee for president, the patriot volunteer soldier, the wise and experienced statesman, the profound political economist, and the pure and noble man; and in Chester A. The majority apparently earnestly engaged in discussing the respective candidates, and enlarging upon the merits and deserts of this or that favorite in the gubernatorial race, around which all interest seemed to center. In fact the contest over this office overshadowed all others, putting them in the back ground,

Beal, for governor," (Continued applause and cheers, in which the spectators in the gallery took part.]

We believe that no citizen is more worthy of that high honor, and that none could fill the position with greater ability and be more watchful of the interests of the commonwealth. Mr. Chairman, if you ask who our candidate is I will say that you may take all the virtues and all the honors and all the good things that have been said by all the speakers in favor of all the candidates and put them together and that is our candidate. [Applause and chers.] I could say more if it were necessary. [Renewed applause.] Our friend, Mr. Horr, said that he put his candidate in nomination on the start to keep him in the lead, but he forgot the scriptural injunction that the first shall be last, and that other equally true one that the last shall be first. [Applause.] Now, sir, no gentleman who aspires to the high honor of being governor of the state needs any endorsement from anybody, for the people of Michigan would not allow any man's ambition to grow to the extent of presuming to come before a state convention unless he was worthy. Consequently, sir, it is a logical conclusion that every man who is presented to a convention like this is worthy of that high honor; but we must make a choice. They cannot all be governors, and some of us will not be governors; so where there is such a diversity we must settle the question. How shall we do it? We are told that the north needs representation in a general sense. That is not true; for I never have been in a convention where they failed to be thoroughly represented, [Applause and laughter.] We are told that the country that the country of the sum of the presented to be thoroughly represented, [Applause and laughter.] We are told that the country that the country of the sum of the presented to be convention to t and up to the time of the calling of the convention to order the race had been so even among the several contestants that it was mpossible to even surmise who would be The convention was called to order by Senator H. The committee on permanent organization reported the names of the temporary fficers for permanent ones. Upon th announcement of which Mr. Campbell made a stirring appeal for J. Webster Childs as a candidate for congressional honors in this district. He said there was Washtenaw county belonged the nominasorry that the parties were so evenly

but one candidate from this county, and that in unity there was strength; that to tion, and if they would act in unison it would go where it belonged. He was not divided in this country, as it necessitated putting forward the best men by both sides. He considered the republican party the party of this country in morality and virtue, and contained the conservative power of the nation. As it has been for twenty years in power, and presented such an admirable record, he had no fears but the people would still retain it there. If we could have the congressional nominee from this county, it would give the county ticket a grand impetus and carry the party

forward to victory. After Mr. Campbell finished, Dr. W. II. Hall, of Ypsilanti, moved that the convention assemble into representative districts to chose the necessary delegates, each district to recommend a proper person for lelegate at largo.

E. P. Allen, in seconding the motion. spoke in favor of sending a solid delegation to Adrian in the interest of Hon. J. Web ster Childs, and he thought in case they did so, there would be no doubt of that gentleman's nomination and election. He closed his remarks by suggesting the name of Andrew Campbell, the chuirman of the convention, as suitable for delegate at

The different districts then went into I would say to my Friends and caucus and chose the following delegates: ist District—E. P. Allen and F. K. Owen, Yp-dianti; L. C. Allen, York; H. D. Platt, Pitts-field; Harvey Bennett, Saline, leid; Harvey Bennett, Saline,

Tarring Fence Posts.

A correspondent of the Country Gentle-man writes as follows: "I have tried tarring fence posts, and seen it tried by others a great many times, and my experience is that near the surface of the ground (the difficult place to keep sound) the preservative effects of the tar are completely neutralized in from one to two years by the action of the soil-wet and dry. I saw some oak posts treated with a covering of hot coal tar, set in July, 1869, which completely rotted off, and the fence had to be rebuilt in 1877. The location of this fence, lowever, was such that it was subject to

requent changes of wet and dry. "It occurred to me, some years ago, that after applying coal tar it would be a good plan to burn it off, thus producing a charred surface, which will resist decay under all circumstances. I set some white cedar

this manner, as the confined moisture soon and Logan. [Long continued applause]. It honors the great patriots living and the rots the posts from the inside, but I can see no reason why a dry post so treated will not great patriots dead. It has blessings for

last a great many years.
"In the experiments which have been made with coal tar applied to woodwork exposed to earth and moisture, it has been found important to heat both wood and tar to cause it to enter the pores, and this is this great party of which we are members, to cause it to enter the pores, and this is doubtless effected very efficiently by the charring described in the preceding report of experiments. Simply applied to the surface of wood exposed above ground, coal tar has been found to do more harm than good. Where we have used it for wood at the surface of the ground, properly driven into the pores, it has made it clouds, and glittering in the eternal sunshing of the purest fame. The old music last in some instances twenty years, when without this protection it would not survive five years.'

A Cheap Fertilizer.

The best fertilizer to use in setting fruit trees of all kinds is partially or thoroughly decomposed chip-dirt. We made use of the material for the first time some twenty years ago in planting an orchard, and it was a wonder to those not in the secret what caused the trees to make such a fine growth the first season, and afterwards, too, for that matter. This experiment was so satdirt is the very best material to mix in the growth.-Exchange.

IN THE WATER.

Instructions by Which we May Keep From Drowning.

The human body weighs a pound in the water, and a single chair will carry two grown persons. That is, it would keep the head above water, which is all that is neccessary when it is a question of life or death. One finger placed upon a stool or chair, or a small box, or a piece of board, will easily keep the head above water, while the two feet and the other hand may be used as paddles to propel toward the shore. It is not at all necessary to know how to swim to be able to keep from drowning in this way. A little experience of the bouyant power of water, and faith in it, is all that is required. We have seen a small boy, who could not swim a stroke, propel himself back and forth across a deep, wide pond by means of a board that would not sustain five pounds weight. Children and all others should have practice in the sustaining power of water. In what will sustain a pound weight is all that is necessary to keep one's head above water will serve better in emergencies than the greatest expertness of a swimmer. A person unfamiliar with the buoyant power of water will naturally try to climb on top of the floating object on which he tries to save himself. If it is large enough that is all right, but it is generally not large enough and half of a struggling group is often drowned in the desperate scramble of a piece of wreck or other floating object, not large enough to keep them all entirely above water. This often happens when pleasure boats capsize. All immediately want to get out of the water on top of the overturned or half-filled boat, and all are drowned except those whom the wrecked dredths of the weight of their bodies and the disabled boat the other hundredth, they might all be saved under most circould get their hands on the gunwale. These are simple facts, easily learned, and may some day save your life.

No Bad Habits.

A young man who was at home on a brief vacation was overheard in conversa-tion with his mother who expressed some habit. I don't smoke, nor chew, nor drink, nor lie, nor steal, nor swear." God keep that young man. May he be strong in the Lord, and in the power of his might. young man to be able to say in truth what | foot up to nearly \$60,000 per month. that young man said. It is a great thing for a young man not to have a single bad habit. And yet this should be the aim and the endeavor of every young man. He should form no bad habit. And if he has been so unwise as to form any, he should hasten to break off from it, whatever it may be. A bad habit is a bad thing. And why should a young man cling to a bad thing? He should neither smoke, nor chew, nor drink, nor lie, nor steal, nor swear, nor gamble, nor enter the doors whose house is the way to hell, leading to the chambers of death, nor break the Sabbath, nor scoff at religion, nor practice any and save great expense. The greatest immortality, for all these are bad things. The Truth Eloquently Stated.

Hon. Emery A. Storrs closed his Burgton speech with the following fine pero-

Making no criticisms upon Gen. Hancock's career as a soldier—that he was a gallant one no one is inclined to dispute that he is a man of personal integrity no one is inclined or disposed to question. He is a professional soldier. I like to preserve the eternal harmony of things. I like the relation between the bullet and the ballot to be harmonious, consistent and confidential. I object to Gen. Hancock, that he shoots one way and votes another.
We want a man who votes against the idea
that he fought against. [Applause.] We
want the bullet and the ballot to take the

eignty of the states. He undertook to kill, and did kill, the enthusiastic advocate of state sovereignty who guarded his enthusiasm with his gun, but he votes for the survivor of the same idea. I object to this irrepressible conflict between the ballot and the bullet of the union soldier Moreover, we are a curious people. We wish to know who will be president when our candidate is elected. When General James A. Garfield is elected president of the United States, he will be president; but should General Winfield Scott Hancock be elected president of the United States, God, in his infinite wisdom, only knows who will be president. The First Crow Eater. The chaff about eating crow-a dish which is just now in great demand—springs from a story in old Knickerbocker Magis factory that when we set our new orchard we made a liberal use of this material, with the same satisfactory result. These trials have proved to our satisfaction that chipdirt is the very hast material to mix in the tured to suggest that the spring chicken soil as you plant the tree that can possibly was rather tough, or that the roast beef be used, for the reason that it holds moist must have been cut from the cow's hoofs, be used, for the reason that it holds moist-ure, and is full of the elements of plant food; therefore, it promotes a most luxuri-"too partickerler," and the aristocrat of food; therefore, it promotes a most luxuri-ant, natural and healthy growth. Repeated trials have satisfied me that a tree is not only more sure to live, but will make double the growth the first year (especially if a dry season), if some two bushels of chip dirt season), if some two bushes of chip dire are properly used in its setting, than it would without it. A single trial will convince the most skeptical that the best possible use that can be made of this valuable material is to apply it to the soil in planting trees in order to push forward the tree during the first precarious stages of its and by dint of soft words and filthy lucre induced the cook to allow him to prepare the crow for the table. He boiled it nicely, and then it wasn't such a bad looking dish. His heart misgave him; the "flinty old cuss" would eat it after all. The cook was a Scotch-woman, and used snuff. He bor rowed all she had and sprinkled it liberally over the crow, gave it another simmer, and then taking it on a salver brought it before his host, saying as he sat it down, "Now, my dear sir, you have said a thousand times, if you have said it once, that you can eat crow; here is one very carefully cooked."
It is said the old man turned pale for a moment but braced himself against the back of his chair, and with "I kin eat crow," he began, cutting a good mouthful. He swal-lowed it, and then preparing for a second onslaught, he looked his boarder straight in

Wei De Meyer's Treatise on Catarrh xplains the following important facts: 1. That Catarrhal Colds become a poisonous in

ction, at first local, and finally constitutional, 2. That, being Constitutional, the infection is be yond the reach of mere local remedies. 3. That impurities in the nostrils are necessarily vallowed into the stomach and inhaled into the lungs, thus poisoning the Digestive, Respiratory and enito-Urinary organs. 4. That Catarrhal virus follows the mucous mem

brane and causes Deafness, Dyspepsia, Chronic Diarrhea, Bronchitis, Leucorrhea, and Consump 5. That Smokes, Douches, Inhalations, and Insolu ble Snuffs, cannot possibly remove infectious inflam
