

Vol. XVI. ANN ARBOR, FRIDAY, NOVEMBER 1, 1861. No. 824.

THEY WILL BE DONE. BY JOHN G. WHITLER.

We see not, and ask not, all our way. It might, with Thy alone in aid, Above the storm our prayers we lift, They will be done!

The flesh may fail, the heart may faint, But who are we to make complaint, Or cease to plead with God above, The weakness of our love of ease? They will be done!

We take with solemn thankfulness Our burden up, nor ask it less, And count it joy that even we May suffer, serve, or wait for Thee. Whose will be done!

Though dim as yet in tint and line, We see Thy picture on our hearts, And thank Thee that our age supplies The dark relief or sacrifice, They will be done!

And in, or our unworthiness, Thy sacrifice we see, From Thy own blood, Thy own sweat, Thy own tears, Thy own blood, Thy own sweat, Thy own tears, They will be done!

If, for the age to come this hour Of trial hath vicarious power, And listh Thy own present pain Be Liberty's eternal gain, They will be done!

Strike, Thou, the Master, we thy keys, The scepter of the destitute, The mine of Thy lofter strain, Our hearts shall breathe the old refrain, They will be done!

PERENNIAL COTTON. The Cotton Problem Solved—Proposed General Culture of Peruvian Cotton—Lecture by R. C. Kendall, Esq.

A very interesting lecture was delivered at the Cooper Institute last evening by R. C. Kendall, Esq. Among the attendants were some of our most prominent merchants and other citizens of equal note.

Mr. Kendall presented his favorite theory as follows: The Gossypium Arboreum, or Peruvian cotton tree, will yet answer the most universal call for a cotton capable of being cultivated in Northern latitudes.

It is perennial, can be grown wherever Indian corn can be matured, and promises to yield larger crops than the present herbage cotton, and mode of manipulation are such as can readily be performed here.

I have already proved, by personal experiment, that it can be grown in the northern part of Maryland, and shall most earnestly urge the proposition of more extended experiments, fully assured that its successful introduction will tend to prevent any future recurrence of difficulties, such as now derange the harmony of the country.

He then proceeded to consider the various sources from which England expects to replace the American deficit, disposing of the claims of the several countries as follows: China is too remote; besides, seven-tenths of all the cotton produced in the vast Empire of the Celestial is as a short, staple, coarse fibre, and muddly white, totally unfit for the manufacture of any of the finer quality of goods, and consequently of slight value in the British market.

India is somewhat nearer, and cotton of a superior quality has been, and may, accidentally, be grown there. But India, in her people, climate, soil, and all pertaining to the organization, is doubtfully unreliable. Australia will doubtless one day afford a great deal of cotton, of a quality equaling the "mid-ling" island staple grown in the Southern States. But Australia is still a semi-wilderness, peopled with a mixed population, little inclined to agricultural labor.

Natal, to the eastward of Good Hope, will after twenty millions pounds sterling shall have been expended upon it, produce a very fair upland cotton, in sufficient quantity to supply three first-class Manchester mills; not much beyond that, Leeward on the West Coast, would do considerably better, but to keep up the supply from Leeward would require a constant stream of emigration from Great Britain to replace those who would be cut off by the terrible malaria of the country.

Guiana, Demarara, Trinidad and Honduras will all produce cotton, and neither of them of the quality that England mainly requires, and collectively, not one-fiftieth of the quantity that England must have. As for Egypt—she has produced cotton probably since cotton first grew, but whatever she might have accomplished in the days of the Ptolemies, it is certain that in modern times her cotton is by no means a superior article.

It is unquestionable that within the boundaries of Peru and Bolivia there is a cotton region of sufficient extent to furnish more cotton than England requires. But that region is beyond the possible grasp of British enterprise. Along the borders of un navigable rivers, coursing down the Pacific slope of the coast range, the perennial Peruvian cotton has been previously produced in small quantities. Between the years 1851 and 1858 there was an average annual yield of cotton from the valley of the Chira of 6,000 bales perennial cotton, weighing one hundred and fifty pounds each, fully six-tenths being of spontaneous growth.

His solution of the cotton supply question was presented in the following terms: The Island of Jamaica, under judicious culture and energetic management, would afford three-tenths of the whole amount required by Great Britain. Two-tenths would have to be sought after, and found in divers far-off corners of the world, leaving the remaining one-half to be gathered up, for a few years, and best it may, from precarious sources; but ultimately to be supplied by the present Free and Border States of North America.

Starting and Utopian as this declaration may appear, the study of cotton in all its economy for more than half an ordinary life-time, with an actual practical experience in cotton-growing for more than twenty years, has convinced me beyond the shadow of a doubt, that perennial cotton can be profitably grown in any territory possessing requisite quality of soil for its natural development, where Indian corn will mature its crop. That there is a condition of soil far more indispensable to the successful culture of cotton, than any definite temperature of climate, my own observations and experiments have proved.

Two-thirds of the present Free States of the Union possess this requisite of soil—several of them in an eminent degree; and there is no well founded reason why they should not afford an unlimited supply of cotton, equaling in quality the best Southern staple, and at a clear profit to the producer of fifty per cent, above the average proceeds from the usual farm crops; and that, too, without materially lessening the breadth of land now devoted to grass and grain, or seriously interfering with the routine of economy, as at present conducted.

He detailed a series of experiments made by him with the Peruvian tree cotton, both in its discovery and its culture. He claims to have shown by actual practical working of land, that while the Southern cotton would, under the most advantageous circumstances, yield but \$200 per annum to a field hand, the Peruvian tree cotton would yield on Northern soils \$463. He knew the tree to be capable of producing 2,000 pounds to the acre, and it could be grown in places used for other purposes, often not interfering with other crops. On this point he said: The period is not very remote, when hedges, most efficient as fences, shall yield annual dividends of superior cotton—cottons far exceeding the useful and the beautiful, shall repay ten fold their cost and culture; when the ragged heights of the Hudson, the plains of New Jersey, the fertile valleys of the Keystone State, and the undulating Prairies of the Great West, shall gleam in the sunlight, with the wicker drift, with generous pods of democratic cotton.

He alluded to the skepticism of the world as to the probability of grape culture in the United States, the ignition of Leigh cult, the utility of underdraining, or the use of the potato, and the triumphant surmounting of all obstacles, and predicted that the culture of Peruvian cotton will ultimately meet with the same success. He introduced the following opinion of a Mississippi cotton-planter of the availability of Peruvian cotton: "Perhaps one of the most striking instances where the utilitarianism of the age, ever ready to grasp the substantial benefits of every thing, derived from the votaries of science, has been the will which, in the fact that a cotton bearing tree, producing annual crops in the greatest abundance, enduring without replanting, through a series of years, yielding a fair crop in the third, and attaining its maximum in the sixth or seventh year of its growth, is now flourishing within two thousand miles of the cotton fields of the cotton fields of the United States, in a soil and climate similar to those of the Middle States of this Union, where it has grown neglected for a practical purpose, only, or occasionally employing his rude industry, from a period anterior perhaps to the far off times when ancient Greece and Rome paid tribute to the cotton looms of India."

In conclusion he said: The regions to which the perennial cotton tree is indigenous are not so remote or inaccessible in regard to it may be easily obtained, and it set our farmers and cotton capitalists will refer to with but half the will which has characterized our Northern horticulturists, we shall ere long produce, in the Free States, an abundant supply of the best cotton. Specimens of the new cotton were exhibited at the close of the lecture, and compared favorably with ordinary cotton samples.

Extract from Mr. Russell's Last Letter. It is but a month since I was driving through a magnificent undulating fields, hemmed in by broad belts of forest, and heavy with crops of Indian corn and tobacco. The rough wooden and brick huts huddled together in the neighborhood of the country seats peopled by men, women and children with black faces, but for which they might have done duty easily for Hungarian or Lithuanian peasantry, attired in uncouth clothes and gaudy lumbering boots, shuffling and hulking through the fields as if in search of monstones, the iron master, a good, kind hearted, gentleman, polished and well read, looked on them very much as the Irish squires of the old time regarded squatters—creatures who ought to be made useful, who were not profitable, who had no business to be where they were, and who, nevertheless, could not be got rid without imputation of cruelty which would make him odious in the land.—He was perfectly satisfied the free labor of whites would be more profitable, but what was he to do with his black? What was he to do with the white laborer he wanted? With these sentiments, he felt bitterly the insults of the abolitionists, who called him a slave-driver and a nigger-broder. In this case, most of the fathers of these blacks had been transmitted to him by his ancestors, and had lived as families on the estate for several generations. To look at the fields, luxuriant weeds and filled with stones, was to be satisfied that the system of agriculture was patriarchal, and the system of labor was not.—But, in fact, their condition was very different from that of the slaves on the southern plantations. The proprietor of these broad domains, is like many of the Maryland gentry, a Roman Catholic, and a priest, belonging to a religious and educational institution founded by the piety of his forefathers, is engaged to look after the religious welfare of his flock, and I saw a full congregation of the slaves trooping through the meadows to chapel, looking in their very dresses and natural groupings, very unlike the beings who are cribbed up like rabbits in the hutches in the South. Then, after service was over, came flocks of woolly-headed children of both sexes to the priest for examination in the catechism. The houses in which they lived were larger and better than the slave quarters on most plantations, but were not cleaner nor more airy, and it seemed to me as if the inhabitants were a little less respected in their demeanor.

In the name of the crinoline, yellow shawls, pink and white dresses, wonderful bonnetry and quaint turnout, how did the proprietor afford to turn out such gay nymphs of Africa? He did not afford it at all. Grant that home-reared chickens and pigs paid for some of it, still enough came out of his pocket, in addition to feeding and supporting them,

to leave very little between their labor and positive loss. It was no use to call them early, for they dawdled about the fields all the more. Here, in fact, was a state of things which would soon cure itself, if let alone. The greater part of the estate, indeed, was farmed out to others, on the principle of one-half or one-third of the produce in lieu of rent, and I suspect that was far the most profitable mode of dealing with these widespread areas. I am assured that there are many estates in Maryland in the same condition. It may be imagined how their proprietors [reson the proprietor] which threatens to rain them utterly, and how this last blow, dealt at the Legislature of the State in which they feel so much pride, is felt by men as tenacious and haughty as any Magyar or Pole who ever lived.

BOARD OF SUPERVISORS. WEDNESDAY, OCT. 23, 1861. AFTERNOON SESSION. Board met pursuant to adjournment, Mr. Compton in the chair. Present a quorum.

Mr. Gray, from Committee No. 1 on Claims, reported as follows: Claimed Allowed. 250. Wm. Melnyre, constable fees, \$18.75 \$16.47

261. Wm. F. Roth, Justice fees, 41.33 41.33

262. Wm. F. Roth, Justice fees, 36.13 36.13

263. John L. Traver, witness fees, 1.12 1.12

264. E. G. Traver, witness fees, 1.12 1.12

265. W. A. Hatch, juror fees, 200.50 200.50

266. Timothy Hall, witness fees, 1.80 1.80

Report accepted, and claims allowed as recommended.

Also claim of W. A. Hatch, of \$12 for night watch, on which the committee were disagreed.

Mr. McColl moved it be allowed.— Mr. Gray moved to amend by allowing it at \$8.

Mr. Palmer moved it be laid on the table. Carried.

Mr. Gray moved to take bill of Mr. Hatch from the table. Carried.

The amendment prevailed—yeas 12, nays 10.

The motion was amended prevailed, and the bill was allowed at \$8.

267. W. A. Hatch, for night watch, \$12. \$8.00

Mr. McColl moved to reconsider the vote by which the bill of Thomas F. Leonard (No. 164) was yesterday allowed. Carried.

Mr. Gray moved that the bill be allowed at 200.37. Carried—yeas 17, nays 5.

Mr. Childs, from Committee to which was referred the report of the Swamp Land Drainage Commissioners, reported as follows: Your committee would report that they have had under consideration the report of the Drainage Commissioners, and after a careful examination of the same are satisfied that they have discharged their duty in accordance with the Drainage Law.

Your committee would further report they have examined the amount of taxes on each Ditch in the several Townships, which is as follows: ACACIA—Miller Marsh, \$548.00 Bear Swamp, 29.67 Piny Harris, 112.35 690.11

FREEDOM—Buss Ditch, 322.74 Dieselie Ditch, 209.94 Sharon & Sylvan Ditch, 157.70 690.38

LAMA—South Branch Mill Creek Ditch, 3925.94 3925.94

LYNDON—Lyndon No. 1, 1066.63 1066.63

NORTHFIELD—Branch of Horse Shoe Lake Ditch, 97.33 Grove's Ditch, 1620.40 Mad Lake " 245.99 1863.72

SHARON—Sharon & Sylvan Ditch, 665.95 665.95

SYLVAN—Sharon & Sylvan Ditch, 87.64 87.64

WHEELER—Cheery Ditch, 668.17 Piny Harris Ditch, 752.50 1320.67

THURSDAY, OCT. 24, 1861. Board met pursuant to adjournment, Mr. LeBaron in the chair. Present a quorum.

Journal of yesterday read and approved.

On motion of Mr. Wheelock, Mr. McColl was added to the Committee on Unfinished Business.

Mr. Beahan, from Committee on Volunteer Family Relief Fund, reported as follows: Resolved, That the sum of \$16,000 be and is hereby appropriated and called the Volunteer Family Relief Fund; that \$5,000 of the above named fund be raised by tax this present year, and that orders drawn on that fund from the first day of November next, until the cash fund is exhausted, shall be drawn without interest; that the several Supervisors be and are hereby requested to inform the County Treasurer, and that the County Treasurer be and is hereby requested to inform each Supervisor within the cash fund is nearly exhausted, and then issue orders to all Supervisors of the County as heretofore, but only at 7 per cent interest from the date they are issued.

The report was accepted.

Mr. Smith moved that the report be adopted, which motion prevailed—yeas 18; nays 1, Mr. Thompson. Absent, Messrs. Compton, Tisdale, Lay, Crittenden, and Childs.

Mr. Gray, from Committee No. 1 on Claims, reported as follows: Claimed Allowed. 255. J. O. Seaton, Justice fees, \$14.37 \$13.86

256. H. H. Lawrence, " " 1.96 1.96

257. C. H. Vanover, " " 79.41 79.41

The report was accepted, and the claims allowed as recommended.

Mr. Haire, from Committee on Rejected Taxes reported, recommending that the rejected taxes reported to this Board be assessed back upon the several wards and townships as follows: Ann Arbor city, 3d and 4th wards, \$269.52 Ann Arbor town, 465.68

268. R. Wheelock, 1 day, \$1.50

269. R. Wheelock, 20 days, 30.00

270. Thos. Clark, 1 " 1.50

271. H. O. Smith, 3 " 4.50

272. Wm. Hiseock, 2 1-2 days, 3.75

273. L. H. Jones, 2 1-2 days, 3.75

274. E. D. Lay, 1-2 day, 75

275. A. Bond, 2 " 3.00

276. F. Coon, 2 " 3.00

277. L. Palmer, 7 " 10.50

278. C. Krapf, 3 " 4.50

279. O. White, 1 " 1.50

280. P. McKernan, 2 " 3.00

Report accepted, and claims allowed as recommended.

Mr. Raymond, from committee on Salaries of County Officers, reported, recommending the several salaries be fixed as follows: Of County Clerk, at \$700 " Treasurer, at 800 " Prosecuting Atty, at 700

Report accepted, and motion to adjourn was lost.

Adjourned to 8 1-2 o'clock, to-morrow morning.

FRIDAY, OCT. 25th, 1861. Board met at 8 1-2 o'clock, A. M., Mr. Compton in the chair. Present a quorum.

Journal of yesterday read and approved.

Mr. Gray, from Committee No. 1 on Claims, reported the following: Claimed Allowed. 290. Wm. Melnyre, constable fees, \$18.75 \$16.47

291. Wm. F. Roth, Justice fees, 41.33 41.33

292. Wm. F. Roth, Justice fees, 36.13 36.13

293. John L. Traver, witness fees, 1.12 1.12

294. E. G. Traver, witness fees, 1.12 1.12

295. W. A. Hatch, juror fees, 200.50 200.50

296. Timothy Hall, witness fees, 1.80 1.80

Report accepted, and claims allowed as recommended.

Also claim of W. A. Hatch, of \$12 for night watch, on which the committee were disagreed.

Mr. McColl moved it be allowed.— Mr. Gray moved to amend by allowing it at \$8.

Mr. Palmer moved it be laid on the table. Carried.

Mr. Gray moved to take bill of Mr. Hatch from the table. Carried.

The amendment prevailed—yeas 12, nays 10.

The motion was amended prevailed, and the bill was allowed at \$8.

267. W. A. Hatch, for night watch, \$12. \$8.00

Mr. McColl moved to reconsider the vote by which the bill of Thomas F. Leonard (No. 164) was yesterday allowed. Carried.

Mr. Gray moved that the bill be allowed at 200.37. Carried—yeas 17, nays 5.

Mr. Childs, from Committee to which was referred the report of the Swamp Land Drainage Commissioners, reported as follows: Your committee would report that they have had under consideration the report of the Drainage Commissioners, and after a careful examination of the same are satisfied that they have discharged their duty in accordance with the Drainage Law.

Your committee would further report they have examined the amount of taxes on each Ditch in the several Townships, which is as follows: ACACIA—Miller Marsh, \$548.00 Bear Swamp, 29.67 Piny Harris, 112.35 690.11

FREEDOM—Buss Ditch, 322.74 Dieselie Ditch, 209.94 Sharon & Sylvan Ditch, 157.70 690.38

LAMA—South Branch Mill Creek Ditch, 3925.94 3925.94

LYNDON—Lyndon No. 1, 1066.63 1066.63

NORTHFIELD—Branch of Horse Shoe Lake Ditch, 97.33 Grove's Ditch, 1620.40 Mad Lake " 245.99 1863.72

SHARON—Sharon & Sylvan Ditch, 665.95 665.95

SYLVAN—Sharon & Sylvan Ditch, 87.64 87.64

WHEELER—Cheery Ditch, 668.17 Piny Harris Ditch, 752.50 1320.67

THURSDAY, OCT. 24, 1861. Board met pursuant to adjournment, Mr. LeBaron in the chair. Present a quorum.

Journal of yesterday read and approved.

On motion of Mr. Wheelock, Mr. McColl was added to the Committee on Unfinished Business.

Mr. Beahan, from Committee on Volunteer Family Relief Fund, reported as follows: Resolved, That the sum of \$16,000 be and is hereby appropriated and called the Volunteer Family Relief Fund; that \$5,000 of the above named fund be raised by tax this present year, and that orders drawn on that fund from the first day of November next, until the cash fund is exhausted, shall be drawn without interest; that the several Supervisors be and are hereby requested to inform the County Treasurer, and that the County Treasurer be and is hereby requested to inform each Supervisor within the cash fund is nearly exhausted, and then issue orders to all Supervisors of the County as heretofore, but only at 7 per cent interest from the date they are issued.

The report was accepted.

Mr. Smith moved that the report be adopted, which motion prevailed—yeas 18; nays 1, Mr. Thompson. Absent, Messrs. Compton, Tisdale, Lay, Crittenden, and Childs.

Mr. Gray, from Committee No. 1 on Claims, reported as follows: Claimed Allowed. 255. J. O. Seaton, Justice fees, \$14.37 \$13.86

256. H. H. Lawrence, " " 1.96 1.96

257. C. H. Vanover, " " 79.41 79.41

The report was accepted, and the claims allowed as recommended.

Mr. Haire, from Committee on Rejected Taxes reported, recommending that the rejected taxes reported to this Board be assessed back upon the several wards and townships as follows: Ann Arbor city, 3d and 4th wards, \$269.52 Ann Arbor town, 465.68

268. R. Wheelock, 1 day, \$1.50

269. R. Wheelock, 20 days, 30.00

270. Thos. Clark, 1 " 1.50

271. H. O. Smith, 3 " 4.50

272. Wm. Hiseock, 2 1-2 days, 3.75

273. L. H. Jones, 2 1-2 days, 3.75

274. E. D. Lay, 1-2 day, 75

275. A. Bond, 2 " 3.00

276. F. Coon, 2 " 3.00

277. L. Palmer, 7 " 10.50

278. C. Krapf, 3 " 4.50

279. O. White, 1 " 1.50

280. P. McKernan, 2 " 3.00

Report accepted, and claims allowed as recommended.

Mr. Raymond, from committee on Salaries of County Officers, reported, recommending the several salaries be fixed as follows: Of County Clerk, at \$700 " Treasurer, at 800 " Prosecuting Atty, at 700

Report accepted, and motion to adjourn was lost.

Report frequently; so that when they are pushed, our men can come up on their flank.

The following order was issued by Col. Baker at 2 P. M., of Monday on Harrison's Island, and opened by his permission by J. M. Howe, acting Adjutant, who took a copy of it to Col. Baker:

COLONEL, &c.—Sir: As soon as you get our column in position make a dash at Leesburg, and shoot down every lawless deprecator who may leave the ranks. General Sherman is moving up on the left, and will take the right. I expect to be in Leesburg tonight.

This shows the implicit reliance placed in the reconnaissance of Monday night.

How to Have Good Cider. Professor Horsford, of Harvard University, has recently published a recipe for improving and preserving cider, by means of which the progress of the various and acetic fermentations may be arrested at pleasure and the cider preserved in just such a state as may be desired.

That the new cider in lead casks or barrels, and to ferment from one to three weeks, according as the weather is cool or warm. When it has attained to lively fermentation, add to each gallon three-fourths of a pound of white sugar, and let the whole ferment again until it possesses nearly the best pleasant taste which it is desirable should be permanent.

Professor Horsford, of Cambridge, was the applicant for a patent for this purpose, and to him is due the credit of first calling attention to its usefulness. It is in no respect deleterious, as the sulphite into which the sulphate is changed by the liberation of sulphurous acid, is entirely insoluble, and remains at the bottom of the vessel.

The writer had cider prepared in this way two years since, which has remained unchanged, and is now a beverage of unsurpassed excellence.

The white of lime, not the sulphates, must be used.

Important Discovery—Interesting Fact.

A gentleman from a Western city who has just returned from a Western tour, stopped for a time with a friend who is the proprietor of a large paper mill. Now a paper mill, as is well known, is a perfect omnium gatherum—a center to which come all sorts of manufactures, as well as raw materials.

The discovery proves what has often been intimated, that Gen. McClellan planned (?) the Mexican campaign, while Gen. Scott received the credit and glory and fame which attended the success of our army in Mexico.

We do not mention this interesting fact by way of detracting from the well earned reputation of our illustrious Gen. Scott, or with the desire of plucking a single leaf from the massive laurel-crown that adorns his honored forehead, but because it is a fact, and one which will have the effect to increase the confidence of the friends of the general in him upon whom rest the greatest responsibilities of the present war.

Our dispatches Saturday alluded to an leading article in the Toronto Globe on the credit of Gen. Scott, and our immediate measures for coast defense. The Globe, after stating the points of the circular and saying that there is nothing in it calculated to excite alarm, remarks:

If the northern States cannot conquer the South, the fact will become clear in the course of time, and recognition will then be season enough. If on the contrary the North reduces the rebels to obedience, the nation which has recognized their independence will have an account to settle with the United States which will be just as well to avoid.

Setting aside all considerations of justice and morality, and placing the matter upon the lower ground of expediency, we do not see that the republic has the slightest reason to anticipate foreign interference. While it would be a violation of law, divine and human, it would also be contrary to that policy which looks only to gain.

The President, the conservator of the national interest, has no more to do than his duty when he determines to place the country in a position to resist enemies from without as well as traitors from within. It is not a nice position for any free people to be at the mercy of any nation, no matter how chivalrous or how peaceful that nation may be.

We have seen for years past in England, when the peace party have declared that the ruler of France entertained no sinister designs, the reply has been, "What is the use of that?" and it is below the dignity of the people of Great Britain to retain their freedom because Napoleon did not choose to attack them. And the argument holds good on this side of the Atlantic.

The United States has entered upon a civil war, of which it may be we have only seen the commencement. The people are enthusiastic, they are determined to maintain the integrity of the Union. Now while they are yet unbroken with the contest, while they are possessed of their full strength, is the fitting time to provide for disasters which may befall them when they are pressed with a load of debt, and when their best blood stains the field.

While the Union was undivided, while each citizen who dwelt within its vast domain felt proud to bear allegiance to the stars and stripes, there was little necessity for any precautions. But under present circumstances, the government in inviting the State Legislatures to take into consideration the matters mentioned by Mr. Seward's circular, is exercising a discretion the wisdom of which we of the British Empire, considering our antecedents, should be the last to impugn.

An attempt will be made to show that this letter of Mr. Seward was intended to menace Canada. We apprehend if fear of England was the special inducement to the initiation of the project indicated in the letter, that such fear has been caused by the persistent misrepresentations of the organs of the Canadian government. No sane man can suppose that visions of foreign conquest dazzle the eyes of the members of the United States Cabinet at this moment.

1861. FALL & WINTER GOODS. C. H. MULLEN & Co's. HAVING to give CASH for nearly all kinds of Goods purchased in New York we are necessarily obliged to restrict our credit system here. Consequently we shall offer...
