Which resolution was adopted.

The Chairman appointed as such committee, Messrs. Krapf and Treadwell. The Prosecuting Attorney presented 325 Daniel LeBaron the following communication, in response to a resolution of this Board:

> WASHTENAW COUNTY, PROSECUTING ATTORNEY'S OFFICE, October 23rd, 1865.

Hon. James McMahon, Chairman Board of Supervisors: The following, Resolved, That the Prosecuting Attorney be requested to instruct this Board, in writing, as to the duties of the several Supervisors in the assessment of the real and personal property of corporations formed under any special or general law of the State for manufacturing purposes, having been certified to me as passed by the Board of Supervisors, I have the honor to submit the follow-

Section 785, C. L., provides that "all property of private corporations, (except in cases whe e some other provision is made by law, shall be assessed in the name of the corporation in the township or ward where the same shall be situated." And Sec. 795, C. L, requires "every person of full age firm body politic or corporation," to set forth in writing to the Supervisors a correct description of all the property personal and real, held or owned by th m not required to pay a specific tax, and not exempt by law from taxation; and Sec. 798, C. L., expressly exempts any person from including in such statement, any share or por-tion of the capital stock of any company of corporation, which corporation is required to pay a specific tax hy law to the State, or whose corporate property is subject to taxation under Sec. 785 C. L. The law formerly provided for the payment of certain manufacturing companies of a specific tax (C. L. Sec. 1819,) to the State of one half of one per in lien of all other State taxes, &c but Act No. 21, in the session laws of 1865 amends Section 1819, C. L., repealing the spe cific tax of certain manufacturing companies but providing that they shall be liable to be assessed for "all real and personal estate held by them, and that they shall pay thereon a tax for Township, City. County, and tate purposes," the same as other personal and real estate, and that the act might not be misconstrued, it expressly provides that nothing therein contained shall authorize the taxing the capital stock of such corporation as such capital stock. It is manifest that at the passage of this amendatory act, the Legislature not only did not intend to make shares or capital stock taxable, but understood that they were not already taxable. It is clear then, by the provisions of amendatory section (Act 21 Laws 1865,) and Section 785, C. L. that the property of private corporations (that is cor-porations organized for manufacturing and other purposes) who do not pay a specific tax is liable to taxation in the township or ward where the same is situated, and it is equally clear that the words property of private corporations means such property, personal and real as is held by them in their corporate capacity, and not the stock or shares thereof held

or owned by individuals.

From the provision of law above cited, and from a careful examination of former legislation, and the law now in force, I am of opinion that shares of stock of any corporation to manufacturing purposes or otherwise, (in the hands of individuals,) which corporation is required by law to pay a specific tax to the State or which owns personal or real proper-ty subject to taxation is not taxable, and the Supervisors in such cases should not assess to individual stock holders the stock or shares There are, however, certain other organiza-

tions and corporations, members and stock holders of which live in the county, some of which are stockholders of corporations organ-ized under the laws of other States, and derive no local cor, orate capacity from the laws of the State of Michigan, and which corporations do not come under any of the legal exemptions before cited, and in such cases I am of opinion that stock thereof in the hands of individuals is subject to taxation under the laws of this State making stock of foreign corporations taxable. But the class of com-panies or corporations (organized under the laws of this State) having no corporate property here upon which a tax can be levied are nevertheless subject to taxation upon their personal and real property, and I am inclined to the opinion that the fact of such corporations having no property to be found by the Supervisors does not render the shares or stock of such corporations any the more taxable, and in my opinion, such stocks even are not taxable, although I confess this last proposition is not wholly free from doubt. All of which is respectfully submitted.

But growers and holders contend that wool is now and has been for the last four years, relatively cheap as compared with other commodities, and that in a general settling down of values to the normal standard, their staple would suffer the least.

We apprehend, however, that the practical realization of this theory must depend very much upon circumstances, such as the relation of supply and demand, and the ability of wool operators to sustain a heavy financial pressure .-It is an undeniable fact that the wool crop of the country is at present entirely inadequate to its consumptive exigencies; and further, that it is principally held either in first hands, who are in no strait to realize, or by commercial operators, who have a solid basis of capital, and hence not disposed to make unneces-

ANN ARBOR MICH

FRIDAY MORNING, NOV 3, 1865.

The city of Jackson has rail oad on the brain, and the principal business transacted there, about these days, is the holding of railroad meetings and voting loans to aid in the construction of this, that or the other railroad. But Jackson does something besides talk; it acts, and the fruits of its energy are being seen. Fifteen miles of the railroad to Lansing are already completed, and the Capital city will be reached probably by Christmas. The Grand River Val ley Railroad is well under way, and in a few days Jackson County is to vote on the proposition to loan its credit largely to the enterprise, and the oily words of Jackson men will, we prerume, succeed in making the country towns believe that their interests are identical with those of the city, and the loan will

view, not a side-cut, but a main line, no less than the proposed extension of the Grand Trunk from Port Huron to Chicago, crossing the Central at that city, and making it the railroad center of the State. In aid of this work large promises are made, both by the city and

In the meantime, what are our citizens doing to secure additional railroad connections and accommodations? We cannot see that the promised prelimipary survey of the proposed Toledo. Ann Arbor, and Holly Railroad is being made, or that any thing is being done towards perfecting the organization of a company. This route is one of the most feasible now under consideration in the State, but the citizens along it are sitting still and sinning away the day of grace.

As an inducement to immediate action, we see it stated in a Toledo paper that \$12,000,000 have been pledged to construct a railroad from Mackinaw Sheldon, Smith, Thompson, Tuomy, and south, to connect with some road to Cincinnati. The Toledo people wish the Mr. McColl moved to adjourn to 11.2 connection made at that city. Now Ann Arbor is on a direct line between Toledo and Mackinaw, and if our citizens should wake up to their interests before it is too late, and get the Toledo, AnnArbor and Holly company organized. and its road can be made a link in the main chain. When it came up, two Republican members "couldn't see it" in the light of their associates, and so voted with the Democrats; but a major ity of all the members elect was necessary to accomplish anything, and one Democrat was absent, hence the bitch. Politically, it made not a vast deal of difference, and so good humor was pre-

All during the war, an officer known to sympathize with the Demo crats was sure to have all the radical Trays, Blanches, and Sweethearts barking at his heels. And now that a peace has been conquered, the vilest epithets are applied to any gallant soldier, officer or private, who casts his lot with the Democratic party. In New York, Gen. these rates, however, holders are not SLOCUM, one of the truest and bravest of Gen. SHERMAN'S subordinates, ventured to decline a Republican nomination and accept one from the Democrats, condially creeping up to meet the views of tioned on the endorsement of the Presi dent's reconstruction policy, and for so doing he is called a "cotton thief," and this when not a stain rests upon his fair fame. We trust that on Tuesday next ble quantities, and is attracting the at- bis libellers will be rebuked in a manner they will understand.

Our readers will remember that just before the State election, held in Tennessee in the summer, EMERSON ETH-ERIDGE, then a candidate for Congress, was arrested by military authority, and his political campaign prematurely closed. He has recently been tried by military commission, at Columbus, Ky., and acquitted. To do him full justice, a new election ought to be ordered, as his opponent, no doubt, obtained a "snap judgment" because of father was the Rev. Francis Worcester, ETHERIDGE's arrest. His case smocks a little of the arrest of Col. NORTH and other New York Democrats just before the Presidential election.

New York, Oct 31. The Fenian Congress have engaged the new hall, No 148 Broadway, where their meetings will be held in fature .-A private session was held this morning. The announcement by the President of the release of John Mitchell, was received with great enthusiasm. It is probable that the important change in the Premiership, caused by the death of Lord Palmerston, will be the subject of discussion before the Senate, so far as it

relates to the Fenian organization. The release of John Mitchell having been granted by the President, on an application of the Fenian Congress at Philadelphia, presented by a special envoy, the Congress decided that a deputation should proceed to Washington to give expression to the thanks of the organization Accordingly Col. W. R. Roberts, of New York, President of the Senate, and B. Doran Killian, of St. Louis, as special delegates, accompanied by Mr. S. J. Manny, of Toledo, proceeded to the White House, and were given an early interview. On being introduced Col. Roberts addressed the President as follows: Mr. President-I have the honor of

being delegated by the Convention of the Irish American citizens, assembled in And Jackson has another railroad in Philadelphia, representing large social lew, not a side-cut, but a main line, no classes in thirty States and Territories, to wait upon your Excellency and express to you how deeply they feel the act restoring to freedom a man whom they love and venerate, for his self-sac rificing devotion to his native land .-They remember nothing of John Mitchell's American career; they can never forget that he risked all a patriot should for Ireland. I am sure, your Excellency, the American people will have no cause to regret the sympathy they feel, and the friendship we believe they entertain for their fellow-citizens of Irish birth. We, sir, are not unconscious of the fact that we have found in America liberty, justice, and asylum.

President Johnson replied in subtance as follows:

Gentlemen, I am glad to learn that the steps which have been taken in the matter referred to have met with the approval of the gentlemen who have sent you here. As you, sir, delicately re. marked, we could not remember Mr. Mitchell's American career, but we were anxious, as a mark of respect and compliment to the large section of our countrymen with whom Mr. Mitchell was previously identified, to yield to their expressed wishes in that regard.

THE WORLD An Independent Democratic Daily, Weekly and Semi-Weekly Newspaper.

After four years of civil war, forced upon the people of the United States by the violence of sectional parties, we now enter upon a new era of unity and of progress. North and South, a cordial co-operation of all honest men is needed to repair the waste of war, to establish our Peace through the triumph of sound constitutional principles in the admisistration of the government, and our Unity by guarding all that makes Union desirable.

The great Democratic Party, whose history in the past is the history of private presperty, of territorial extension, and of public order in America stands now, as it has ever stood, the Party of the Nation, superior, to all sectional passions in its lovalty to the rights of co-equal States and to the liberties of the individual citizen. Once more its voice will be heard, once more its adherents will be rallied to its time-honored standards in every city and town of the Northern and of the

firm witness throughout the ordest of civil war. It will now be devoted to the not less ardnous task of applying those principles to the solution of the many and weighty quetions-financial, social, political-which smannpon us with the return of peace. Faithful to the real interests of all sections, it will be enslaved by the prejudices and blinded by the

Such is the experience of thousands, Few enjoy continuous health. To what does the occasional invalid attribute his uncertain condition? Not to himself, of course. He lays the blame on the climate, perhaps. It is too hot, or too cold, or too damp, or too dry, or too variable. But does he take the proper course to fortify his constitution and bodily organs against the extremes and changes of which he complains? No. He says, perhaps, that only an iron man could bear such great heat, or such violent cold, or such sudden vicissitudes. Why then does he not resort to the great Tonic and Preventive, which, if it will not make him an iron man, will at least quadruple the capacity of his system to repel all externa agencies that tend to produce disease. HOSTETTER'S CELEBRATED STOMACH BITTERS, taken faithfully according to the directions, will so strengthen the tomach, brace the nerves, tone the liver, and regu late and invigorate the whole animal machinery, that the system, instead of being at the mercy of the weather, and liable to be prostrated by every change of temperature, will become case-hardened, as it were and almost impervious to climate influences. It is to this preventive principle that Hostetter's Bitters owe their great popularity in the West Indias, Briti-h America and Australia. 1w1033.

Dr. Joseph Lewis, of Philadelphia, says of Dr. Shellon's Dyspepsia Troches:

"Some years since Dr. Sheldon, of this city, gave me the formula for preparing a Dyspepsia Troche. He as ared me thathe had scarce ever known it to fall in carring either Dyspepsis or Liver Complaint. Since then I have used it in my practice with great success, I believe that nine out of ten to whom I have administered it have been permanently cursed, it having cured many cases which I consider it incurable. I consider it the most valuable combination for diseases of the die most valuable combination for diseases of the di set most valuable combination for diseases of the di-stative organs I have ever known."

The eminont Dr. Williams has said: "We believe nat the worse thing that a Lyspepele can do is to dose inself with Purgative Medicines. In fact, we know I tundreds who have taken Catharties so long that it

Cabinet Speculations.

is becoming one of unusual importance in the interior of political circles here.

A significant fact is stated to-day. that is, that President Johnson has requested the immediate return, from Europe, of Maj. Gen. George B McCiellan. The fact is stated with much positiveness, and upon high authority.

It is known that Mr. Johnson earnestly desires that his administration shall restore absolute peace and union to the whole country. He wants to be the President of both North and South, and of Of 282 Superior Street, Cleveland, Ohio. both parties in each section. He is anxious to elicit the unanimous support of the people. In this effort he finds it less difficult to bring together, in a unity, the people of the North and South, than to induce the Democrats and R publicans of the Northern States to coalesce. In this emergency, having hitherto left his Cabinet precisely as he found it, he, it is said, proposes to make a direct appeal to the Northern Democracy by selecting for the Secretary of War the man who was the Democratic candidate for President in the last election .-For this reason, it is rumored, the re-

turn of McCiellan has been dem inded. Thomas B. Florence, of Pennsylvana another Union Democrat, has already been prominently spoken of as Secretary of the Navy, and Montgomery Blair, who participated a few days ago in the New York Democratic ratification meeting, is mentioned as probably to be inv'ted to resume control of the Post-of fice Department There is more founda ion for these rumors than most people

of official power

Major General Butler is also mentioned as the radical candidate for the War Department as the successor of Stanton but the reasons assigned for the recall of McClellan are more potent than any essigned in favor of any other whose name has been associated with this appointment. It has been suggested that such appointment would not receive Senatorial confirmation, but Andy Johnson knows what he is about, and has too much firmness to be brow beaten or dictated to by any ephemeral majority in the Senate, which will be melted away within a few

The Action of Plaster as a Fertilizer.

Perhaps no subject connected with agriculture, says the Agriculturist, has given rise to more speculation than the action of plaster or gvp-um on vegetation, Why it should produce such striking results at one tim , why it is apparently u-cless at others, or why it should be beneficial at all, have been problems DRESS GOODS! which the agricultural chemists have found difficult of solution. The columns of some of our cotemporaries have recently been occupied with communica tions upon the subject, which served to show a lack of chemical knowledge upon FURNISHING GOODS. the part of the writers, without increasing that of the readers. In cases like this, one direct experiment is worth a host of speculations, and M Deherain, of France, has, by his labors in this di rection, given us some light upon this indicate that the use of plaster is mainly to liberate the potash contained in the mineral constituents of the soil. In the disintegrated rocks of which the soil is composed, petash exists in an insoluble combination. The plaster is sulphate of lime, which is soluble, and when this, in the moist state, is in contact with minerals containing potash in an insoluble form, the lime and potash change places. The potash is liberated, while the lime of the plaster takes its place in the insoluble mineral. This change is effected very rapidly, as it was shown that soil which contained only a trace of potash, ave, 12 hours af er the application of plaster, an appreciable amount of that substance. Another effect of plaster has been suggested by Prof. S. W. John son in his lectures at the Smithsoniar Institution. It has been found by experiment that the presence of certain substances, plaster among the rest, in the juice of a plant, has a marked tendency to prevent evaporation by the leaves .-It is, of course necessary that a certain amount of the liquid contents of the plant should pass off in this way, but in a very dry time the evaporation may be more rapid than the process of vegetation demands. The use of plaster upon the soil may enable a crop to withstand a drouth much better than upon unplastered land.

Working too Hard.

Go into the dwelling-houses of Chicago, as the male head of the family reaches his fireside, and you shall see a man tired out He will hang up his hat with percente with perchance, brush up and fuss up and take off in compliance with a social "invite," and return between eleven and twelve with the "last straw" on his back that breaks it with

weariness and fatigue. Go into this man's store next day, and you will see a man on the jump, driven with business, on fire with avarice, thrilled to his finger's ends with ambi-tion, and tired out. Through all the sprightliness and vivacity that lights his face and lightens his step, you shall read the unmistakable sign of a tired out man. Now and then, in a moment of respite, he will lean against the desk or doorway, and look abstractedly on the

floor, or complain to his companion of a pain in his back. There can be no manner of doubt, theu, that our business men are going it too strong. They should rein in their ambition, check their greed for gain, and give themselves more to quieter pursuits and recreative sports. Their desire to get rich is eating up their vitality, so

My lungs and liver put on a new action, and the morbid matter which for years had accumulated and irritated the different organs of the body, was eliminated, the tubercles on my lungs ripened, and I expectorated from my lungs as much as a pint of yellow offensive matter every morning. As this expectoration of matter subsided, the fever abated, the pain left me the cough ceased to hards me, and the exhausting night-sweats were no longer known, and I had re reshing sleep, to which I had long been a stranger. My appetite now begen to return, and at times I found it difficult to restrain myself from eating too much; with this return of health, I gained in strength, and now am fleshy. I am now a healthy man, with a large healed cleatrix in the middle lobe of the right lung and the lower lobe hepatized with complete adhesion of the

consumptives for some time, and made many wonder-ulcures; and the demand increased so rapidly that I letermined to offer them to the public, and devote my individed attention to long diseases. In truth, I was next to forced to it, for people would send for me far and near, to ascertain whether their cases were like

For many years, in conjunction with my principal fice in Philadelphia, I have been making regular pro-ssional visits to New York, Boston, Baltimore, and ittsburg.
For several years past I have made as many as five

undred examination weekly with the "Respirometer." or such examination my charge is three dollars, and ranbles me to give each patient the true condition of is disease, and tell him frankly whether he will get rell.
The great reason why physicians do not cure Con umption is, that they try to do too much; they give

in pilon is, that they by to do balance, they generally in elicines to stop the cough, to stop the n ght weats ectie fever, and by so doing they derange the whole igestive system locking up the secretions, and event gestive system locking up the secretions, and event ally the patient dies. The Pulmonic Syrup is one of the most valuable sedicines known. It is nutrient, powerfully tonic, and ealing in itself. It contains no opium, yet loosen he phlegm in the bronchial tubes, and nature throws off with little exertion. One bottle frequently cure an ordinary cold; but it will be well first to take a dose of Schenck's Mandrake's Pills to cleanse the stomach. The Pulmonic Syrup is readily digested and absorbed

into blood, to which ill mparts its healing properties -

The Pulmonie Syrup is readily digested and absorbed into blood, to which ill mparts its healing properties— It is one of the best preparations of fron in use; it is a powerful tonic of the less the mucus in the stomach, and is carried off by the sid of the Mandrake Pills, a healthy flow of gastrie juice, good appetite, and a good digestion follow. The Seaweed Tonic is a stimulant, and none other is required when it is used. It is pure and pleasant; no bat effects like when using Bourbon whisky, which disorders the stomach torpors the liver, locks up all the secretions, turns the blood into water, dropsy sets in, and the patient dies suddenly.

Bourbon whisky is recommended now-a days by almost every physician. Many patients that visit my rooms, both make and female, are stupefied with this poison. The relief is temporary. If they cough they take a little whisky; if they cannot sleep, they take a little whisky; if they cannot sleep, they take a little whisky; if they cannot sleep, they take a little whisky; if they cannot sleep, they take a little whisky; if they feel weak and teeble they take a little whisky; if they cannot sleep, they take a little whisky; if they cannot sleep, they take a little whisky; if they cannot sleep, they take a little whisky; if they feel weak and teeble they take a little whisky; if they cannot sleep, they and digestive powers are completele destroyed, and lose their appetite for food. No one was ever cured of consumption by this process, where cavities have been formed in the lungs. A little stimulant is frequently beneficial to consumptives, such as pure brandy or good wines; in many cases London porter or brown stoutin moderate quantities; but Bourbon whisky hastens on instead of curing consumption.

The Seaweed Tonic produces lasting resutes, thoroughly invigorating the stomach and digestive system, and enabling it to eliminate and nake into leadthy blood the food which may be used for that purpose—this so wonderful in its effects that a wine-glass tull will digest a hearty meal

medicines possess the power of doing.

The MANDRAKE PHLIS may be taken with entire safety by all sges and conditions, producing all the good results that can be obtained from calomel, or any of the mercurial medicines, and, without any of their hurtful or injurious results. They carry out of the system the feculent and worn out matters loosened and dissolved by my Seaweed Tonic and Pulmonic Sycup.—

It will be seen that all three of my medicines are needed in most cases to cure Consumption.
