NO TIME LIKE THE OLD TIME. BY OLIVER WENDELL HOLMES,

There is no time like the old time,
When you and I were young,
When the buds of April blossomed,
And the birds of spring-time sung.
The garden's brightest glories
By summer suns are nursed,
But O, the sweet, sweet volets,
The flowers that opened first!

There is no place like the old place,
Where you and I were born,
Where we lifted first our eyelids,
On the splendors of the morn,
From the milk-white breasts that warmed us,
From the clinging arms that bore,
Where the dear eyes glistened o'er us
That will look for us no more!

There is no friend like the old friend
That shared our morning days,
No greeting like his welcome,
No homage like his praise;
Fame is the scentless sunflower,
With gaudy crown of gold;
But friendship is the breathing rose,
With sweets in every fold.

There is no love like the old love There is no love like the old love.
That we courted in our pride;
Though our leaves are falling, falling,
And we're fading side by side,
There are blossoms all around us,
With the colors of our dawn,
And we live in borrowed aunshine
When the light of day is gone,

fret or bemoan herself.

There are no times like the old times-There are no lowes like the old times—
They shall never be forgot!
There is no place like the old place—
Keep green the dear old spot!
There are no friends like our old friends—
May heaven prolong their lives!
There are no loves like the old loves—
God bless our loying wives!

MY GEORGIE.

I have been asked to tell the story; but, if I tell it at all, it must be in my own way. I'm an old woman now, and if I ramble and maunder at times, why, erhaps you would do the same if you were sixty years old. It wasn't necessary to see through a millstone to see that one of the girls loved him with her whole heart, while the other-but there! I have got into the middle of the story, and haven't told you the beginning yet.

There wasn't any great harm in Ida—
I believe that thoroughly—but the child was too much of a kitten to know her own mind. Pretty? Oh, yes, very pretty, even to my old eyes; just the sort of beauty that old age likes, with plenty of light and color about it—great soft dark eyes, and heaps of dark tan-gled hair, and the bloom of the damask rose on her soft oval cheeks. She was a good little thing in the main, but fanciful and flighty and capricious as a willo'the-wisp, and with a whole storehouse of romance treasured up in her foolish little brain. It was really as good as a play to see that dainty, luxurious little reature sitting there in her silks and aces, talking about self-sacrifice and the pleasure of working and economizing or the man one loved. Work and econ-

natured, and generous in an impulsive open-handed way; but, bless you! she had about as much power of loving in her as a kitten. She could like people and be fond of them, and all that sort of thing, as long as everything was smooth and pleasant; but at the first touch of adversity-puff! her little rush-light of whole thing was, and be carried away and captivated and fascinated in spite of love was out with a whiff instead of burning up clearer and stronger and fiercer for the blast, as it ought to do if herseif. And all the while my little t were the right sort. What is the use of being hard upon

Of course there was nothing for Mr. upon who comes in for it at the end. Georgie was one of that kind, I think; a little mite of a creature, with none of Drayton to do but to say that he would be delighted to escort her. I caught Ida's brightness or bloom about her, one swift glance from Georgie's eyes, but taking, in her way, too, with the and then I remembered that he was to look of quiet resolution about the square chin and firm little mouth, and the have taken her on that very evening to hear a celebrated pianist, who was setwistful, yearning spirit that seemed al-ways peeping out of the blue-gray eyes. ing the whole city wild; but Georgie did not speak. The detective system was a mystery past our comprehension, and we could do nothing but sit at home and wait, deluded with fresh hopes or sickened by fresh fears as day after day crept slowly on.

You understand that, apart from the norror of the mystery so suddenly thrust into our midst, my heart was wrung for Georgie, bearing her burden of anguish so patiently. Day by day her little face grew paler and thinner, and the wistful, yearning look deepened in her eyes, and her lips were more firmly set in their resolute line. > In the vicinity of the continents many springs are no doubt borne directly into the ocean, having no earthly history or career at all, like a child that dies on the day of its birth. Off the coast of Florida many of these submarine springs have been discovered. It is a pleasant conception, that of the unscientific folk, that the springs are fed directly by the sea, or the earth is full of veins and arteries that connect with the great reservoir of waters. But when science turns the conception over and makes the connection in the air-disclosing the great

water main in the clouds, and that the mighty engine of the hydrsulic system of nature is the sun, the fact becomes more poetical, does it not? This is one of the many cases where science, instead of curtailing the imagination, makes new and large demands upon it. The hills are great sponges that do not and cannot hold the water that is precipitated upon them, but that let it filter through at the bottom. This is the way the sea has robbed the earth of its salts, its phosphorus, its lime, and many other ineral elements. Railroad Rates. Another move in the game of chess now being played between the various Eastern railroads was made yesterday. The New York Central ordered a further reduction in the rates on fourth class freights, making them twenty cents per Another move in the game of chess and twenty-five cents to Boston. This is a reduction of two and one-half cents per 100 pounds. Heretofore the charge on grain has been from two and one-half to five cents lower than fourth-class freights, but by this last move grain and fourth-class freights are placed on the same footing, twenty cents being the current rate on the former article. What the next move will be is hard to tell. It the use of this cheap, but nutritious is hardly probable that another reduction in freight rates will be made, as those now charged are lower than they have

to reap some profit if possible. The worst sufferers from the present railroad war are, next to the vessel-owners, the elevator men in this city. Most of the grain now shipped goes by railroad, and does not stop in at all. The elevators expected to do an immense business this spring, and instead of this they are almost idle. There are, however, very few to extend them any sympathy. They are merely reaping what they sowed last winter.—Chi-

cago Tribune. Riding Camels.

Mounting the camel is not difficult, but it has some sweet surprises for the novice. The camel lies upon the ground with all his legs shut up under him like a jackknife. You seat yourself in the broad saddle, and cross your legs in front of the pommel. Before you are ready, something like a private earthquake begins under you. The camel raises his hind quarters suddenly, and throws you over upon his neck; and, before you recover from that he straightens up his knees and gives you a jerk over his tail; and, while you are not at all certain what has happened, he begins to move off with that dislocated walk which sets you into a see-saw motion, a weaving backward and forward in the capacious

saddle. Not having a hinged back fit for this movement, you lash the beast with your koorbash to make him change his gait. He is nothing loth to do it, and at once starts into a high trot, which sends you a foot into the air at every step, bobs you from side to side, drives your backbone into your brain, and makes casti-

Gladly now we gather round it,
For the tolling day is done,
And the gay and solemn twilight
Follows down the golden sun.
Shadows lengthen on the pavement,
Stalk like giants through the gloom,
Wander past the dusty casement,
Creep around the fire-lit room.
Draw-the curtain, close the shutters,
Place the slippers by the fire;
Though the rude wind loudly mutters,
What care we for wind-sprite's ire?

What care we for outward seeming?
Fickle fortune's frown or smile?
If around us love is beaming,
Love can human ills beguile.

The point to which England principally objects is the decision of the powers that in case their friendly intervention should not prove pacific the six powers unitedly would have to consider other and more effective measures. England thinks this contains the principle of armed intervention, and is a menace to the liberty and independence of Turkey.

Final APPEAL.

We, therefore, appeal to sil good citizens who find their own sentiments expressed in this address, be they inside or outside of party lines, to ofganise in their respective districts and communicate with the executive committee appointed at this meeting, so that efficient co-operation may become possible. Let no effort be spared in bringing the influence of patriotic public opinion to bear upon those who, in the customary way, are soon to nominate the party candidates; and then, in any event, let us be ready to do what the best interests of the Republic demand. Our generation has to open the second century of our national life, as the lather's opened the first. Theirs was the work of independence. Ours is the work of reformation. The one is as vital now as the other was their. Now, as then, every true American must have the courage to do his duty.

RESPONSIBLE GOVERNMENT.

The World is Governed Too Much."-Speech of Hon. William A.J. Sparks; of Illinois, in the House of Representatives. responsibility of the servant.

This he evinced unmistakably by the simple and unostentatious exercise of his official duties, acknowledging constantly in his every act to his countrymen that he was their servant. act to his countrymen that he was their serv-ant, selected and commissioned by them to subserve their will, and to devote his best en-ergies to their welfare, and not to subordinate orgies to their welfare, and not to subordinate his position to promote selfish ends or personal aggrandizement. Hence he discountenanced and banished from the executive office and the Executive Mansion all of the trappings and idle meaningless flummery of aristocratic pretensions, and substituted therefor the plain and simple, yet intelligent and dignified, demeanor and surroundings appropriate to the republican simplicity of a nation not only of freemen, but of sovereigns owning their own Government.

Appreciating fully his responsibility and accountability to the people, he made during his Presidential terms of office his permanent residence at the nation's capital, where with Presidential terms of office his permanent residence at the nation's capital, where with watchful vigilance he, as its head, could direct and control the executive administration, and, being at his post of duty, could prevent corruption and detect inefficiency on the part of the subordinate efficials connected with the Government of which he had charge.

Residing at the nation's capital, with the Government archives at hand, he could direct and properly instruct its diplomatic representatives abroad, and also properly receive and con-

tives abroad, and also properly receive and con-fer with the accredited embassadors of the nations with which ours was on terms of po-

litical intercourse.

Recognizing his responsibility as a servant, he was extremely cautious in guarding against all approaches to secure patronage by designing men, who by interested kindness or valuable gifts seek to ingratiate themselves into his favorable consideration for the selfah pur-pose of obtaining office, and which, when obtained, they would use to acquire fortunes for themselves by plundering the people's

Conscious that he, like other men, was possessed of the passions and impulses of a human nature, he knew that it was dangerous, when acting as the high servant of the people, to acting as the high servant of the people, to allow himself to be patronized by the designing sharper. He would accept no gifts, and hence had no improper inducements to the granting of official favors, and therefore appointed none to office except those who based their claims on merit, and who could successfully withstand rigid examination and sustain character thereby both for integrity and capability.

As President of the United States, and recognizing that he held that station as the servant of the people, with its duties to be discharged so as to promote their prosperity and happiness, and deeply sensible of the obligations thereby imposed, the selfish desire to enrich himself or by it to advance the forunes of those connected with him by the ties of relationship could have no controlling influence over him.

sir, he did not, and would not, appoint any of his relations or kindred to office. He did not believe that the various offices subject to his bestowment were his individual perquisites, nor subject to distribution by him among his kindred and personal favorites; but, on the contrary, he regarded them as simply committed to him in trust as the chief servant of the second and they him duty was to dispense them. ted to him in trust as the chief servant of the people, and that his duty was to dispense them in their interest to those, and to those only, to whom the public mind pointed as best fitted by experience, qualifications and integrity, to discharge the incumbent duties thereof with efficiency and fidelity.

In thus manifesting a knowledge of the character of his responsibility, and acting in conformity to it, we now, in reviewing the eminent success of his administration, readily realize that his was the only sure pathway of safety.

His higher attained an always for a few properties of

controlled purely in the interests of the public.
His high station demanded an abnegation of self, and of all selfish influences, and an exalted, untrammeled effort in all things to meet the demands of the public will, and he was strong enough and patriotic enough faithfully to discharge its duties.

And as it was principle that prompted him so it was with all of the early Chief Magistrates. The doctrine of "sovereign power in the people," and responsibility and accountability to them by the servant, was a cardinal principle with all of them, to which high standard, faithfully acted up ic, the safety and welfare of the Republic was assured.

But, furtunately for us, in these later yours we have been drifting away from these wholesome precepts and these good examples, and as a result, the public sentiment is debaushed, public morals corrupted, and mismansgement,

as a result, the public sentiment is debauched, proble morals corrupted, and mismanagement, misrule: and widespread demoralization permeate the whole body-politic.

Sir, I do not, and would not on this occasion and in this presence, make personal attacks. On the contrary, I would desire to treat fairly and deal kindly with all men in official or unofficial stations; would prefer, sir, and can with much reason, attribute the corruptions, frauds, and political demoralizations, which admittedly exist all around us to the rapidly growing tendency of a vicious

moralizations, which admittedly exist all around us to the rapidly growing tendency of a vicious system which has strung up among us.

This system, sir, is simply a reverse of the good one that I have been describing. Officials now are beginning to feel that they are not responsible to the people as a sovereign power standing behind them, and whose sovereign will they are to elsey, but rather that they of themselves are the legitimate sources of authority.

sponsible to the people as a sovereign power standing behind them, and whose sovereign will they are to obey, but rather that they of themselves are the legitimate sources of authority.

Should a chief magistrate feel thus, we could hardly expect of him an administration such as we have been describing. The master seldom obeys the beheate of the subject. Nor is the ir esponsible ruler likely to manifest any nice sense of duty or obedience toward those whose prerogative it is to rule and control.

And, now, sir, comparing the political tendencies of the present with those illustrating the administration of Mr. Jefferson I venture the suggestion that it will be discovered that there is manifested now a growing, vicious tendency on the part of officials to govern too much, or, to express the same idea in another form, there is too little confidence in the ability of the people to govern, and consequently a disposition exhibited by political leaders to encreach upon that I have been able to give to this subject, that if the political actors who were contending for the country on a gre by existing contracts of the present such as a full legal the political actors who were contending for the proper of the payment of such colors.

of his principles.

Let us for a moment consider the basis upon

of his principles.

Let us for a moment consider the basis upon which each of these eminent men founded Let us for a moment consider the basis upon which each of these eminent men feunded their diverse theories. Jefferson, realizing that necessity was the author of progress, favored the imposition of the heaviest possible responsibilities upon the people, realizing that when responsibility was devolved upon them it created demand for thought and action, thereby developing higher qualifications and etevating the general standard of capacity. Hamilton, on the other hand, conservative and patristical in his views, doubted all radical encroachments on the theories of the past, and therefore advocated the retention of power in the few.

4. We most earnestly protest against any further issue of gold-bonds for sale in foreign markets, by which we would be made, for a long period, hewers of wood and drawers of water to foreigners, especially as the American people would gladly and promptly take at par all the bonds which the Government may need to sell, provided they are made payable at the option of the holder, and bearing interest at 365-100 per cent. Acting up to this standard, there was developed a class of membership which for integrity, ability and moral uprightness challenged the respect and admiration of the civilized world.

civilized world.

To be known in the early days of the Republic as a member of the American Congress was of itself an accredited passport of respectability among the good and the great wherever good and great men lived.

A Congress composed of men feeling that they were simply responsible and accountable servants of a sovereign constituency behind them, with the eyes of that constituency constantly upon them, could not and would not

Sir, a Congress of men who fully appreciate such a body unguarded, unconstitutional sub-sidies and grants of lands and money, to over-grown, soulless corporations would be an im-

Good servants as legislators, feeling their responsibility to their sovereign masters the peo-ole, could not and would not pass laws of a doubtful constitutionality; and specially would they guard against doing so when those laws involved the appropriation of large sums of money wrung from that people by onerous

With a Congress thus composed the disgraceful taint of a credit mobilier could have had
no existence. Neither would the fury of a
nation's anger have shaken the Republic with
the indignant and peremptory demand for a repeal of a "salary grab." For the members of a
Congress feeling even their responsibility as the
people's servant could not have been corrupted
by the one nor have voted to make the other.
And now, sir, in attempting very briefly yet
practically to present the result of these unfortunate tendencies, allow me to call attention to
the character of legislation that has received

THE "INDEPENDENTS." National Convention at Indianapolis-Peter Cooper nominated for Presi-

dont.

The National convention of the Independent party, recently held at Indian-apolis, nominated Peter Cooper, of New York, for President, and Newton Booth, of California, for Vice-president. The of California, for Vice-president. The following platform was adopted:

The Independent party is called into existence by the necessities of the people, whose adostries are prostrated, whose labor is desprived of its just reward by a ruinous policy, which the Republican and Democratic parties refuse to change; and in view of the failure of these parties to furnish relief to the depressed industries of the country, thereby disappointing the inst hores and expectations of

The tone of the press and the people all concede it; nor shall I charge that any political organization or body of men in our country are intentionally disposed to thwart its legitimate application or defeat its purposes, but will content myself with the expression that in my judgment we are gradually, yet certainly, drifting beyond and away from it.

The system demands the constant recognition of the sovereignty of the people, and of accountability to them by their servants, who, as their agents (selected and chosen by them), exercise the functions of office in their name by virtue of their authority and for their good, the servants, from the highest to the lowest, realizing ever a constant and abiding responsi-FIRE INSURANCE.
