BLINDFOLDED.
Two little white hands put over the eyes,
And tresses of hair brushing over the cheek;
A mad, merry voice in my ear laughing cries:
"Who is it holds you, sir? answer me quick!"
Do I not know them, the bonny red lips,
Trim little waist in the calico gown,
Eyes with long lashes where tremulous slips
The love-light half bashfully, tenderly down?
Do I not know them? Ah I love, I was blind
Ere the dainty ringed hands came over my eyes;
And reguish white arms ne'er closer can bind
Than the love which once kindled to life never
dies. -Will Wallace Harney, in Appletons'.

THE BROKEN OAR.

Once upon Iceland's solitary strand
A poet wandered with his book and pen,
Seeking some final word, some sweet Amen,
Wherewith to close the volume in his hand.
The billows rolled and plunged upon the sand,
The circling sea-guils swept beyond his ken,
And from the parting cloud-rack now and then
Flashed the red sunset over sea and land.
Then by the billows at his feet was tossed
A broken oar; and carved therein he read,
"Oft was I weary, when I tolied at thee;"
And like a man who findeth what was lost,
He wrote the words, then lifted up his head,
And flung his useless pen into the sea.

—Henry W. Longfellow, in Atlantic Monthly.

THE LILY.

I saw the lily pale and perfect grow
Amid its stient sisters in the mead.

Methought within its chilly depth to read
A maidenly severity, as though
A cool young life lay slumbering in the snow
of its frail substance. In that chalice white
Whose fairy texture shone against the light
An unwakened pulse beat faint and slow.
And I remembered, love, thy coy disclain,
when shou my love for thee hadst first divined;
Thy proud, shy tenderness—too proud to feign
That willful blindness which is yet not blind.
Then toward the sun thy lily-life I turned—
With sudden splendor flushed its chalice burned,
-H. H. Boyesen, in Seribner.

ST. VALENTINE. ST. VALENTINE.

The sleet was blowing; where was any sign of greening valley, call of mating bird?

Yet, close beside my ear, a voice I heard—
A whisper—"Sweet, choose now your valentine!"
"Nay, wait till skies are softer, airs more fine."
But still, impetuous, fell that whispered word,
"Choose, choose your valentine!"
What was it stirred,
Like breath of June, this yielding heart of mine?
Sudden, the bleak earth blossomed into bowers
of bridal beauty—for its wreathing snows,
Wide banks of creany jessamine and rose—
While, on the pane, bloomed out great passionflowers;

flowers;
And I—so subtle-sweet Love's whispers are !—
Be sure for choice I did not wander far.
—Coroline A. Mason, in Scribner.

TOO WIDE!

Oh, mighty Earth, thou art too wide, too wide!
Too vast thy continents, too broad thy seas,
Too far thy prairies reaching fair as these
Now reddening in the sunset's crimson tide!
sundered by thee how have thy children cried
Each to some other, until every breeze
Has borne a burden of foud messages
that all unheard in thy lone wastes have died!
Draw closer, oh, dear Earth, thy hills that soar
Up to blue skies such countless leagues apart!
Bid thou thine awful spaces smaller grow!
Compass thy billows with a narrower shore,
That yearning lips may meet, heart beat to heart,
And parted souls forget their lonely woe!

—Julia C. R. Dorr, in Sunday Afternoon. TOO WIDE!

WINTER. The circling hills with snow are white The dark woods on their sides Stand leafless in the low gray light, The brown cloud o'er them glides.

The low sun chills, the cold moon stares From out the icy east;
The young folk go, in mufiled pairs,
To dancing and to feast; And rising from the snowy roof
Into a passing fold,
The dux smoke weaves its clouded woof
Within the warp of cold. The eaves snap and the whole house shakes;

The moon to western forest deeps
Sinks down, and black airs fall
Upon the land, until there creeps
A glimmering cold through all;
In frosty barns with vapors dim
The cocks alternate crow,
As lifts the sun a glowless rim
To frozen bills of snow.

The best and most popular machine in the world-300,000 sold in a single year, after being on the market over twenty-five years.

Beware of Imitations

To secure the genuine buy of 1. I., Grinnell, the authorized agent for Washtenaw County. It is only a question of time, and not much time either, when the majority of the wild cat machines will not be built, then the warrant of cut-th roat dealers will be of little avail. To buy a second class machine on a third class warrant for five years is poor policy when such a machine as the Singer can be had at a reasonable price.

Senator Ogiesby opposed the bill. He had voted to pension those soldiers of the war of 1812 who had served sixty days, and was willing to pension those who had served sixty days, and was willing to pension those who had served only fourteen days; but he will not aid in restoring to the rolls those who had been pensioned by a grateful country, but who had deserted that country in its hour of need, and who would not now ask to be forgiven. The three which caused most of the debate were Williamson, Collector of New Cricans; Northrup, District Attorney for South Carolina, and Smith, Collector of Mobile. The debate developed the fact that the Republican Senators are, if anything, more united against the President than at any previous period, Williamson's name was rejected by a large majority—the Democrats voting in a body against him, and only fifteen Republicans supporting the nomination. In the case of Northrup, the friend of Wade Hampton, the Democrats voted solidly for him, while all the Republicans opposed him except Messra, Dawes, Hoar, Burnside, and Matthews. Mr. Christsancy, who generally votes to sustain the President, on this occasion opposed Northrup, and he was barely saved by the four mentioned. The result of the day was to show that the five Republicans last named constitute all that can be fairly counted as Administration strength in the Senate. Smith was confirmed as Collector of Mobile by a vote of 26 to 23. the protection of the citizens of the Black Hills...

Partisan Debate in the House of Representatives-Eugene Hale Attacks the President's Southern Policy-Gen. Garfield Defends the Administration.

[Compiled from the House Proceedings.] Mr. Hale, of Maine, said he had been profoundly moved with his observation of the course of events in Louisiana for the past year, and especially for the past six months. In the eginning he had watched the experiment nade there hopefully, believing that the magnanimous and conciliatory course pursued by the President toward that people would be met by a generous and hearty return, but he had een that honor and the plighted support pledged in return for generosity had been forfeited: that the resolutions of that State Legislature went for nothing, and that political prosecutions were urged to-day in Louisiana with a spirit of violence which reminded him of older days. He therefore could keep ilence no longer. He reviewed the course of events in Louisiana from the close of Grant's administration, bringing forward prominently the fact that the title of the Packard Govern-ment and the Packard Legislature had been settled by the Electoral Commission, it being based on the count of the Returning Board, the same Board whose action in the case of the resident had been confirmed by the Electoral ommission whose decision had been accepted y both houses of Congress. Its title had also nce been affirmed by the Senate in the admission by both houses of Congress. Its title had also since been affirmed by the Senate in the admission to a seat in that body of Kellogg, elected to the Senate by the Packard Legislature. He spoke of the eall of that Legislature on the Federal Government for protection against domestic violence. He did not know, and nobody could tell, the reflections that passed through the mind of the President, looking on the subject with a desire for peace, with a disposition for conceiliation, with a tendency toward tendences, determined to start out and commit his administration to a course, not of repression or a strong iron hand upon the people, but of concession, of magnanimity, and disregard the call of the Legislature of Louisianan. He went on to speak of the sending of the commission to Louisiana by the President, the restuit of whose mission was the disintegration of the Packard Government and the installation of the Nicholls Government, and he deet in the prosecution of the Packard Government and the installation of the Nicholls Government and the installation of the Nicholls Government, and he deet in the protection of the Packard Government and the installation of the Nicholls Government, and he deet in the protection of the Packard Government and the installation of the Nicholls Government and the installation Gov. Nicholls had promised a pardon for all political offenses. He asked the House to turn back its mind, and he asked President Hayes to turn back his mind six montas, to the 1st of May, 1877. Would anybody have been found then to predict that in less than sixty days the men who, foremost of all, had made hemselves offensive to the Louis chemiselves offensive to the Louisiana Democ-peracy, because they had carried out the law of that State and had thereby become political offenders against that party in Louisiana and throughout the country, would have been pros-sented? Would the President have been prosthroughout the country, would have been pros-ecuted? Would the President have believed it? Would anyone have believed it?

ness, but since the Nicholls Government had been inaugurated, no man, whether poor or rich, who committed a crime had escaped pun-ishment. He denied that the Returning Board was being persecuted on political grounds. Who had anything to gain by that? Certainly not the people of Louisiana. Certainly not the National Democratic party, for Haves' title had been passed upon by Congress. The Return-ing Board was being prosecuted for forgery. That crime of forgery was trivial in so far as the recent election was concerned, but it was a crime of enormous proportions, and the man who falsified the returns struck a blow at civil ment in the family, though the little one the ty and free government. If this move ment in Louisiana which appeared to be a very simple one was to excite the public mind, to excite animosities, which he had hoped were sleeping in Northern communities, he should depiore it m re than any other man. Reverting to the charge of a commend between the commend to the charge of the charge of the commend to the charge of the deplore it m re than any other man. Reverting to the charges of a compact between the authorities of Louisiana and the Federal Government, he denied it not only for the Nicholls Government, not only for his friends, but he denied it for the Fresident and his Cabinet. They could not be guilty of such a crime.

Mr. Carlisle quoted from a speech made by Decident Hoves the proper that the troops were President Hayes to prove that the troops were withdrawn from constitutional duty, and not as an act of conciliation.

Mr. Hale asked then if the people of the

South were placed under any obligation by it.
Mr. Gibson replied that they were placed under the highest obligations that American citizens could assume. The obligations of free-men in a free State in the American Union, to obey the laws of the United States, and to obey

men in a free State in the American Union, to obey the laws of the United States, and to obey the laws of that State.

Mr. Clymer sa d every portion of the country outside the borders of Louisiana as well as in it was interested in the proceedings now taking place in that State. In behalf of the people whom he represented he could say that they desire that the persons connected with the electoral fraud as principals should be punished; and that all who were abettors and aiders should be punished, because while the country might have to submit to the consequences of that fraud, in the interest of human about all people everywhere should know how and by whom this great crime had been perpetrated. The question should not be considered as a local one. The whoic people is should give encouragement to the people of Louisians to go forward and discover who were the principals. He denied that any agreement implied from the people who were pragmatic and meddle-sport that the persons to the country might have to submit to the consequences of that fraud, in the interest of human hierty all people everywhere should know how and by whom this great crime had been perpetrated. The question should not be considered to coining words and to using words which, though not found in the lexicons, seemed to express his meaning better than any other. his judgment President Hayes was an optimist, who looked only on the bright side of human nature and disliked to look at its dark side. His (President Hayes') faith and hope had been larger than the feith and hope of most people. He had gone forward to the very verge of the constitution in offering both hands in fellowship and in offering the olive branch of peace. He had gone to the limite of his power in order to bring about an era of good feeling and pacification. No man had shared more heartly the aspirations of the President than he (Garfield) had. He had tried in every way to aid the President in his project, and in order to do that there was a world of things to be forgotten and forgiver on both sides. If the strict letter of law had been adhered to at the end of the rebellion, there would have been no end to the awful spectacles of prosecution and punishment (under the law signed by George Washington) against those who had committed the crime of treason.

Mr. Garfield went on to say that the action of the President in removing the troops had been looked upon by the people of Louisiana as a generous and magnanimous action, and they had garlanded the man who had performed it with the richest praise. In that era of recon-illation both sides had forgiven and forgotten nuch. There had been bleeding hearts in the ciliation both sides had forgiven and forgotten much. There had been bleeding hearts in the land at the recitals of the massacre at Hamburg and Ellenton, but these horrible stories were never heard of now. Why? Because there had been a silent determination to let all that terrible chapter sleep. All the outrages which had been committed in Louisiana during the late election had been covered with the veil of oblivion. Who had begun the latter revival of the chapter? While that work of conciliation had been going forward, there had commenced at the North (he afirmed it boldly) the process for laying the keel for another Presidential campaign, and the order had gone forth to Louisiana to open upon the members of the Returning Board—to disguise it under the form of a State proceeding, but to enter a wedge—and then the Democratic power, as the gentleman from Pennsylvania (Clymer) had stated, would summon all its strength to drive the wedge to its head and stamp the great fraud of the election as it deserves.

HAZING AT PRINCETON.

A High Old Time Among the Students-A Number of Them Expelled-Their Departure the Occasion of Intense Excitement.

The Princeton College students have een at their old tricks of "hazing" again, and a great commotion is the result. Heretofore the higher classes have made the students of the lower classes their victims, but in this case the Freshmen reversed the order of things in a way that the Sophomores despised. It appears that a number of Sophomores wrote a fictitious invitation to a Fresh-Next came the stage that was semi-civil and semi-military. It was in this stage that Gen. Grant had taken the reins of the Government, and had endeavored to keep his administration within the province of civil and military power. When he had been succeeded by President Hayes, that gentleman had thought it was possible to declare that the semi-military period had gone, and that the period had come when only peace methods should be inaugurated. In his judgment President Hayes was an optimist, who looked only on the bright side of human students. Carter declined to comply. They were immediately gagged, thrown down, and bound with ropes, and the party of Freshmen amused themselves by clipping their hair so as to make their appearance as conspicuously absurd as possible. The bound and gagged make war on the President for that?

Mr. Garfield replied that the withdrawal of the troops from the Governor's room and office in New Orleans was a constitutional duty. As a political student he (Garfield) had never doubted and did not doubt to-day that Packard bad bean heavelt and did not doubt to-day that Packard had been heavelt and first selected Governor's room and office in the direct disorder, and left. The usual cheers and tigers were ont mean ever to admit that the Presidential title has been settled. The President of the United States was learning to-day a lesson of misplaced confidence. It was the old, old story. There had been nothing which the President could do to make efficacious his course toward the South which he had not done. There had been no encouragement which cruid be held out to that section showing the President's good faith which the President Ministers, and other high officials from that section because he had been anxious that, if the experiment failed, nobody should be able to say it had falled from any lack on his part, and how the return was received from Louisiana. As to the case of the murder of Webber in Feliciana parish, of which Mr. Hale had spoken, he (Gibson) had interes ed himself in having the guilty party brought to justice, and the information which he received was that it was the general impression that Webber had been murdered by a man of his own party, a personal enemy.
