ANN ARBOR, MICHIGAN, FRIDAY, AUGUST 30, 1878.

NUMBER 1702,

I cannot see its tarnished gold,
I cannot hear its vanished tone,
Scarce can my tranbling fingers hold
The pillary d frame so long their own;
We both are wrecks—a while ago It had some silver strings, I know.

"But on them Time too long has played
The solemn strain that knows no change,
And where of old my fingers strayed
The chords they find are new and strange—
Yes! iron stringe—I know—I know—
We beth are wrecks of long ago.

We both are wrecks—a shattered pair— Strange to ourselves in Time's disguise, . . . What say ye to the love-sick air That brought the tears from Marian's eyes? Ay! trust me—under breasts of snow Hearts could be melted long ago!

Or will ye hear the storm-song's crash
That from his dreams the soldier weke
And bade him face the lightning's flash
When battle clouds in thunder broke?
Wrecks—nought but wrecks!—the time was when
We two were worth a thousand men!

And so the broken harp they bring, With pltying smiles that none could blame; Alas! there's not a single string Of a'll that filled the farnished frame! But see! like children overjoyed, His fingers rambling through the void!

And so they softly gather round;
Rapt in his tuneful trance he seems;
His fingers move; but not a sound!
A silence like the song of dreams.
There! ye have heard the air," he cries,
That brought the tears from Marian's eyes!

Ah, smile not at his fond conceit,

Nor deem his fancy wrought in vain;
Te him the unreal sounds are sweet—
No discord mars the silent strain
Scored on life's latest, star-lif page—
The voiceless melody of age.

Sweet are the lips of all who sing,
When Nature's music breathes unsought,
But never yet could voice or string
So truly shape our tenderest thought
As when, by life's decaying fire,
Our fingers sweep the stringless lyre!

THE PRIVATE SECRETARY.

About the beginning of this century, while the Revolutionary Wars were raging, communication in cipher was naturally very prevalent; and ingenuity was taxed to the utmost on one hand to invent, and on the other to detect, the medium used in secret correspondence. As a rule, the decipherer had beaten the cipher; and no known method was secure of detection. If conventional signs merely were used, the recurrence of the lifferent symbols gave a key easily fol- me. lowed out. Some ingenious spirits corresponded by reference to the pages and lines of particular editions of particular books—others by an agreed-on vocabulary. But these last methods, although preserve the secret, disclosed what was often quite as dangerous, that there was a secret. I am about to tell

you of a plan which, for a long time, was not only undetected, but unsuspected. It was at that time when the first Napoleon had assembled his fleets and transports at Brest, with the ostensible, and as is generally believed the real, view of making a descent on England. The greatest precantions were observed by the English Government in regard to the correspondence with France, and an

mount of espionage was practised at the postoffice which left Sir James Graham's subsequent performances in that line far behind. The national excitement was intense, and the political department was administered with an iron

My uncle, Sir George Trevor, was, as all the world then knew, high in the Admiralty, and, as it was from him that I eard this anecdote, its veracity may be epended on.

The dispatches to and from the Admiralty were the subject of the greatest rigilance and the most stringent regulations. The clerks were not permitted to send or receive letters which were not first submitted to the chief clerk, and it was believed that letters addressed even to their private residences were frequently opened at the postoffice.

At the time I speak of, the chief clerk was an elderly man of the name of Transacts a general Banking Business; buys and Parker—a wizened, wiry, dapper indisells Exchange on New York, Detroit and Chicago; vidual, so imbued with the official tincture of Whitehall that it had become and kindly soul, keen and energetic in the affairs of his office, and in all others

ment. "Why, what is the matter, Parker? Has Bonaparte come ?" "He may have, for aught I know,"

"The letters are wrong. There is a spy among us. I have known it for g; now I am quite sure; but I cannot

Parker went on to explain that he had or some time suspected that some one in the office communicated their private nformation and dispatches outside. He had redoubled his precantions; but, more than ever confirmed in his suspicions, was entirely baffled in his en-

"This matter must be seen to," said my uncle; "I have had my own misgivings on the subject. Bring me all the letters which come to, and are sent by, the clerks for the next week. There is no reason why you should have all the rum things to yourself."
So my uncle had the letters for a week,

and found them very much as Parker had described them. The suspicious symptoms increased; the Stock Exchange responded more sensitively than ever; but not the slightest ground for suspecting any one transpired. My uncle was bewildered, and Parker was rap-

idly verging to insanity.
"It is certainly not the clerks," said my uncle. "There is no treason there." said he, pushing back the letters of the day. "By the way, how does young Beaumont get on? She seems a nice creature, that sister of his, to judge by

There is no such person as Elinor Beaumont, and the address in Fleet street is a notorious haunt of suspected foreigners." "Good gracious!" said my uncle, changing color, "you don't say that?"

"It is a fact, but you will see the necessity of being cautious and silent in the matter. Detection hangs on a thread as it stands, and a whisper will "What do you mean," said Parker,

MY DEAR CHARLES: Although we had an adverse wind all the way, we made without difficulty the port we were bound for. My aunt, in spite of the weight of her 50 years, enjoyed the trip much, and is ready to sail again. I hope you will think of sending the line you promised on the 25th, and come yourself, as our party is much smaller, and we should enjoy the visit.

When I was in London last week I saw our cousin Harry, fresh from Windsor. There is tttle change to be observed in him—not as auch as you would expect. Come to us on

Friday.
Yours, very affectionately, Enron B. My uncle read this out loud, from beginning to end, and then he said, "Do you see anything suspicious in that? It eems to me very innocent." "Hum! It may be. Was there any-thing else in the desk?" said he, address-

ing Parker,
"You may go and look," growled that
potentate; and he led the way, the ex-

pert following. The desk was quite empty, with the exception of two or three scraps of waste paper. On one of these the expert pounced, and returned with an air of lation to the other room. He then unfolded this scrap of paper, and disclosed a half-sheet exactly the size of the paper on which Elinor Beaumont's letters were written, in which oblong holes at inter-

vals had been cut. He then placed this half-sheet over the letter, and handed both, thus placed, to my uncle, whose astonished eyes read the following words, which the holes left visible: "Fleet wind-bound. Fifty sail of

the line, 25 smaller. Should the wind change, expect us on Friday." "The devil!" said my uncle; "and Nelson ordered off to the West Indies." Then was there, as you may suppose, hurrying and scurrying, and running and chasing, and dispatching of Government couriers, and semphore telegraphs, and carrier-pigeons, and all the Old World means of communication then in fashion. The key thus obtained disclosed the whole correspondence, which turned out to be a series of letters from the French Government, smuggled into Jersey. Invention of the Phonograph. While experimenting on an automatic transmitter in the early part of last win-ter, Mr. Edison tried tin-foil, instead of paper, to receive the indentations of the Morse recorder, and was surprised to see how readily it received them. These indentations, passing under another needle, were to repeat the message automatically to another wire. A few days after, while hardling a telephone, the fancy seized him to fix a needle-point to a diaphragm and see whether the vibration of the diaphragm when spoken against would cause the needle to prick his finger. It did. Then he wondered what sort of an indentation this would make in a slip of paper. He tried it, and, sure enough, there was the sem-blance of an indented track! What would be the effect of drawing this slip under the point again, following the work of the automatic transmitter? tried that, and the result was one which almost made him wild. A sound like the stifled cry of words seeking birth came from the diaphragm. No sleep or food until he had made a grooved cylinder, put a piece of tin-foil instead of paper on it, attached the diaphragm and shouted into it, when, upon turning the crank, the words came back with a marvelous elecution, and the phonograp! was a success.—Popular Science Monthly for August.

In answering this I shall demonstrate that narrow-gauge roads are essential to cheap transportation. I shall proceed to proofs by showing first, saving in construction; second, in equip-ment; third, in dead weight; fourth, in increased relative power to carry freight; fifth, decrease in wear and tear; sixth decrease in running expenses. Estab lishing these positions, I shall proceed to inquire, seventh, can a pure freight road be made to pay? Eighth, how should such a road be operated? Finally, I shall show the demand for cheap transportation, and compare the relative ability of our water means of transport with that of narrow-gauge A Strange Hallucination.

P. S.—To correct the erroneous impression, that my son's failure is the result of our unprofitable stock business, I will state that four years ago I gave him \$3,000 to join a man whose books showed he had just paid \$0,000 toward stock to open a new business in Toledo. Requiring more capital, company notes were given for outstanding claims. In three weeks the entire assets were found to be less than the liabilities assumed. An assignment was made, and, one year after, the assignee reported a compromise in full. Now, the compromise is pronounced illegal, and that my son is liable for several thousand dollars, which, having no moral force, I am unwilling to assist in paying. All other claims against my son or Hall Brothers will be promptly paid by me on presentation.

CAPITAL AND LABOR.

The Hewitt Investigation Prof. Sumner, Professor of Political and Social Science in Yale College, recently gave his views regarding the labor depression, before the Hewitt committee, sitting in New York. He directed attention to the fact that within the last few years the means of transportation and communication became greater, and by these means over-production was the consequence, and had made a revolution over the whole world. He said that when the Suez canal was first opened goods came much quicker, and caused a glut in the English market-new goods accumulating on each of the old; but this glut had now been overcome. Within the last quarter of a century there had Spain, died recently in France, aged 72....The
Russian expedition to Central Asia has been of all kinds, and, taking the accumulated effect of these machines, they must produce a temporary set-back. There was another factor in causing this depression in labor circles. This effect would reach everybody, for the effect that machinery would have would be to cheapen luxuries, and bring down things to the poor classes which a century ago they never thought of. Machinery had been a great THE Khedive of Egypt has reorgan-ized his Cabinet, and is maturing a scheme individuals and classes it had worked looking to extensive reforms and retreuchments in the civil list.... EAST LIBERTY, PA.

THE RAPE OF THE PRESIDENCY.

nati, at Hamilton, Ohio. I am but an humble member of the Demo ratic party. To me it has ever been an honor and proud delight to be associated with those who are wedded to free institutions, constitu tional government and human progress. I have ever agreed with that noble tentiment of the Democracy, "Men are mortal: principles are immortal." The worst enemy of popula government is he who defeats the expresse will of the people, it matters not what agencie be employed for that purpose. In political as in social life, the most despicable, heartless rebber is he who robs you under the forms of law. To my mind the saddest spectacle that ever was witnessed in this country, the foulest blot upon its history, and the one most calculated to make patriots weep and hang their heads in shame, was the inauguration of Ratherford B. Hayes as President of the United States on the 4th of March, A. D. 1877. He witness the solemu obligation he assumed to support and defend the constitution of the United States, he was by that very act subverting one of its most sacred guarantees. envy not the principles of that man who would lend himself to the perpetration of a known wrong. I care not what the inducement may be. To be President of the United States.

when called to that high office by the voice of the people, would fill the measure of the noblest ambition, but no patriot would walk to that hitherto honored place over the fragments of a broken constitution. It is one of the highest encomiums that can be bestowed upon our in-stitutions that they have endured sixteen years of Republican control, and the clastic power and representing energy of the country is such and recuperative energy of the country is such that I doubt not it will survive Hayes' administration, but if the means by which he secured the title to his office are to be taken as prece lents we have already outlived free, represent tive government.

The Democratic party has always had in

mile, and the latter lived fairly. He did not think a revolution would cause a change in this respect.

The people of the whole country since 1873 had been trying to solidify and settle up their accounts. During the last five years many persons had accumulated to the set that to man with in future, attain the office of President of the cials and Republican platform-makers may talk of Mexicanizing, but let them "possess their souls in patience." One dose of the vile mixture has so nauseated the people that they will never swallow another. Let the Republican leaders of Ohio and of the United States be five years many persons had accumulated capital by reducing expenditures. He thought legislation could do nothing for this stagnation in labor. Every person must work along the best way he could. We had heard a great deal lately about over-production. He classed it as about over-production. When the control of the strongest inducements to the rape of the Presidency was to prevent the unearthing of the forum which the executive departments of the Governor than the control of the strongest inducements to the rape of the Presidency was to prevent the unearthing of the forum which the executive departments of the Governor than the control of the strongest inducements to the rape of the Presidency was to prevent the unearthing of the forum of the stolen goods. Call the investigation of the stolen goods. Call to prevent the unearthing of the frauds with which the executive departments of the Government have for years past been recking. You say that it is an attack upon the President's title; we respond, whose fault is it, if, in unearthing fraud and corruption and sturing its cess-pools, a President's title is found concealed, and, being exposed, emits odors so foul that they cannot be endured by patriots? But let me, in all confidence, whisper into the ears of those astute platform-makers, that when they assert that the investigation of the frauds by assert that the investigation of the frauds by which the electoral votes of Florida and Louis-iana were secured to Hayes will cause general distrust, will prostrate our industries, and aggravate and prolong the distress of the laboring and industrial classes, their

crime. Who ever knew objections to be interposed to such investigation by any one except the parties conscious of guilt and their immediate friends? It requires not the vivid imagination or poetic genius of a Milton to discover, in these declarations of the Republican platform, the wailings of those who begin, for the first time, correctly to feel that "their singlefirst time, earnestly to feel that "their sins have found them out," and to have a foretaste of the tortures of the damned. And indeed nted as honored, honorable and worthy of the ighest confidence of the people, whose con-ection with the frauds being investigated is o clearly proved and so well established that is apparent to every one that when they hall have filled out their respective terms of

precious band.

This monstrous fraud was most successfully perpetrated; and the manner in which it was perpetrated, as declared in our platform, ought to have been investigated by the Electoral Commission. The fact that the law creating the Electoral Commission authorized that com-mission to take into view "petitions, deposi-tions and other papers," clearly shows that it was the intent of the framers of that law that these frauds should be investigated. But the eight Republican members of the commiss on, true to the doctrines and spirit of the Republican party, declined to investigate the work of the visiting statemen, and Mr. Hayes and his co-comprisors have received and are entiring the plunder, and "Vo code," how Rome. true to the dostrines and spirit of the keputlican party, declined to investigate the work

The men who planned, centrived and furnished the brain-work for the conspiracy tefa e to disclose their precious information. However successfully they may con mation. However successfully they may conceal the truth I do not envy them their position. The consciousness that the avenger is on their track and has already discovered some on their track and has already discovered some of the pathways to their place of concealment, the sounds of his footsteps which they can now distinctly hear, although as yet apparently distant, are amply sufficient to make them cryout in their agony, as they are now doing, "Oh! wretched men that we are, who shall deliver us from the Andersons, the Webers, the Jenkses, the Finkstons, the Returning Boards the Dennises and McLins, and all the others of like character, our late associates and with whom we took sweet counsel together!" do not say that pat iotic freemen "laugh at their calamities or mock, now that their fear has come," but their desire is that the Potter investigation committee shall proscute its work estigation committee shall prosecute its work igorously, fearlessly, thoroughly, and, in the anguage of the Democratic platform of Maine, they insist that the guilty parties, whose

The innate sense of justice and fair dealing which characterizes every lover of tair deating which characterizes every lover of ruth and hencely prompts the decision that the head of the conspiracy should be crushed and consigned to perdition with the body. It would seem hardly possible for any one to doubt Mr. Hayes' knowledge, in view of the fact that the men who plunned and made of fective the fraud were the men who secured his nomination, were his most intimate friend and advisers during the campaign, and are now filling the best offices at his disposal. But more terribly significant than all this is the fact that what was known as the Southern policy fact that what was known as the Southern policy of the Republican party was the characteristic issue of the campaign, and of which he, as the standard-bearer of the party, was the special representative, the issue, the defeat of which he said, on the night of the election, when he knew, as every honest man did, that he had been defeated, he deplored more than his own defeat, he abandoned as soon as he was inaugurated and adopted the Southern policy of the Democratic party, the constitutional policy

lefeated.

The theory upon which Mr. Hayes and his party had defended its Southern policy was that the army was necessary in the Southern States to prevent intimidation of voters, that ne colored voters of the South could deposit be ballots only in boxes surrounded by bayons. During all the years in which the Re bublican outrage-mill was grinding out its grists order, not one could compare in extent and normity to that furnished by the election in outsians, in November, 1876, according to the natings of the Returning Board, under the amipulations of the visiting statesmen. So the state of the returning that it was to believe these continuent that Demotre to believe these gentlemen, that a Demo-ratio majority of about 10,000 was changed to Republican majority of 5,000, and more; in ther words, over 15,000 voters, at one elec-ion, while the State was still bristling with s, while the State was still bristling with leral bayonets, were prevented from exer-ing the right of free suffrage. What a con-sive argument was here furnished for a con-isnes of the Southern policy of the Re-licen party.

And then we must not lose sight of that And then we must not lose sight of that tragic, soul-harrowing spectacle presented by Eliza Pinkston, with \$500, which had been given her, in bank, and the certificate of deposit for the same in her pocket, in order that, with her hand upon the certificate, her tongue might not forget to utter the words of truth and soberness, walking nimbly up two flights of stairs, and then, under the instructions of the now distinguished Secretary of the Treasury, the right arm of Mr. Haves' administration, losing all arm of Mr. Hayes' administration, losing all physical strength and stretching out upon a sofa, exhibiting ghastly, still-bleeding wounds, and carried into a room where were congrega-ted men of both parties, followed by a cortege of whocked, horrified Republican statesmen, of shocked, horrified Republican statesmen, nttering by their manner far more eloquently than words could have done, "Ye that have tears to shed, prepare to shed them now." It was, indeed, a sight to make "men and angels weep." Poor Eliza! Under the careful and successful training of John Sherman she played her part admirably, and the only thing that mars the beauty of the picture is the fact that the Republican official in New Orleans with whom she intrusted the care of her money in hank showed that he was truly worthy to bank showed that he was truly worthy to a Republican official by stealing all the loney but \$50. This was, however, an unusually generous divide. He only took nine tenths; whereas, the rule was to take all. The number of affidavits charging outrages

and intimidations, prepared at the Custom House at New Orleans, was only limited by the clerical force at command to write them. There was no difficulty in getting them sworn There was no officially it getting them swort to and certified, though known to be false. The eight of the Electoral Commission may have thought there were no frauds to investi-gate, though it is hard to reconcile such belief with the fact of their refusal to investigate; out all these frauds were committed under th mmediate eye and special direction of the in-imate friends and conscience-keepers of Mr. Layes, and it is not possible that he was not ully advised of the work they did. The fact doing his work. That Nicholls is to-day Governor of Louisiana and Packard Consul to Liverpool, that the Democratic policy is the Southern policy adopted by the administration, money. It is supposed that many emigrants are now loarding bad money brought from Europe, supposing it to be genuine.

And where were Thy thunderbolts when, as the final consummation of the infamous outrage, he raised his arm and called Thee to witness? How grandly noble could Mr. Hayes have stood before the world to-day, if he had possessed enough manly vircue and patriotism to have declined accepting an office thus sought and tendered! How much more desirable would his lot have been than it now is, when he and his friends are cowering before an investigation of frauds!

ing the word 'dollar' upon it would represent nothing valuable. It is only because this word 'dollar' means so much states had men in both parties capable of adding figures correctly. What, then, the need of an Un'ted States Senator from Onio, a lawyer from New York, and great Republican lights from other parts of the country, to go to New O'l ans to perform a work which, if intended to be honestly done, could just as well have been performed by a school-boy? HONEST MONEY. Extract from a Speech of Dr. Stiles Ken-

nedy, at Ithaca, Mich. This absolute money is something entirely ew to the present generation of Americans. and as it is to be a legal tender for all debts, public and private, let us inquire what it is Here is offe, or the picture of one, of their absolute paper dollars. It reads:

Legal Tender for all Debts and Dues. This is United States Absolute Money Washington, D. C.

This is the money of the National Greenback party, a party named on the lucus a non the Democratic party, the constitutional policy for which the Democratic party had earnestly contended in every political campaign since the war closed, and upon which it was then for the first time victorious, and he and his party lucendo principie, "Kational" from not being national, and "Greenback" because it doe not advocate greenback money as the people anderstand that term. As vet, however, ne debt exists anywhere, by Government or individuals, which was contracted to be paid in this absolute money. It will be of no immed ate use without first repudiating the contracts. Gentlemen, bear with me a moment, and we will examine into those two kinds of dollars : The genuine old-fashioned greenback reads 'The United States will pay bearer one dol-lar." Now, what is a dollar? According to

the laws of this country and commerce of the world, it is a piece of coin containing eithe 25 8-10 grains of gold or 412% grains of silver each 9-10 fine. The Government stamp on i simply certifies that it has this weight and ineness of metal. Some people say that it is the Government stamp that gives it its value It adds to its value really a mere trifle, th cost of the certificate. The commerce and cus toms of the world fix the value of 25 8-10 grains gold, 9-10 fine, and 4121/2 grains silver at nearly a universal and definite figure Therefore, it is the standard or measure o Therefore, it is the standard or measure of value all over the world. And in traveling over the world it would make very little difference whether I had gold coin, gold dust, gold nuggets or silver bars. The only difference would be that if I had dust or nuggets I would have to take them to an assay office and find out the weight and purity and get a proper cer tificate, and I could pay all my bills with it because a certain weight and fineness of it is the measure of value everywhere. A 12-incl rule is a known measure of dimension, a quar measure is a known measure of quantity; by a little equalition those measures are readily little calculation these measures are readily onverted into similar measures are readily converted into similar measures of other nations. And a certain weight of fineness of metal is a measure of value, and this is one of the principal uses of gold and silver coin. It is also, unlike other measures, a means of exchange, but purely as a means of exchange, but purely as a means of exchange a carrier greatic currency is far preferable, but its apper credit currency is far preferable, but its credit must be based on the measure of value adopted by civilized nations. It is the belief on the part of the holder of a paper credit, that at some time, if he so desires, he can convert his paper promise into the adult measure of value, that chiefly makes

it valuable.

Now, where is the measure of value of this Now, where is the measure of value of this absolute money? We are told that it is the "faith and credit" of the country. Well, has not the old greenback the faith and credit of the country, as well as a coin basis? We are told that the Government depreciated its own paper by refusing it for custom duties. The foolishness of this argument is shown by the fact that, in some States in the Union, there are banks whose daily deposits are larger than the amount daily collected by Government as custom duties. If the Government, by printing on a piece of paper, "this is \$1," can printing on a piece of paper, "this is \$1," can make it \$1, known as such to the civilized world, then it can print on another piece of paper, "this is one sheep," and it at once be-

E. GOODBICH. Now, Mr. Goodrich is a very worthy, energetic farmer who lives near me. Index over a year ago. From one plate they printed \$100 notes on the National Bank of Wilkesbarre, Pa.; the Revere National Bank, of Boston, and the Merchants' National Bank, of New Bedford, and \$50 counterfeits were issued on the Pittsfield Bank, of Pittsfield, Mass. Pittsfield Bank, of Pittsfield, Mass. The counterfeits were placed in circulation in the United States. The counterfeiters took the money to bankers in these cities in exchange for gold. The bankers failed to detect the fraudulent character of the notes, as in the set witner, deserving of trust and specie payment. He never knew capitals to be so abundant as now, but there were issued on the specie payment. He never knew capitals to be so abundant as now, but there was great difficulty in using it in business. Another factor is alleviating this distress would be legislation in the matter of resumption of specie payment. He never knew capitals as citizens, deserving of trust and specie payment. He never knew capitals and social relations of the first and the loss and gread of powers and social relations, could retain their integrity in political their integrity in pol

copting an office this solight and tendered! How much more desirable would his lot have been than it now is, when he and his friends are covering before an investigation of frauds! While fraud sits in the highest seats and menscingly flaunts its dirty garments in our faces, patriots will be restive and demand that it be investigated and exposed, and that "all who are guiltly connected with it shall be held to a due accountability."

A Nut for the "Fiat." Fellows to Crack. The Richmond (Va.) Dispatch furnishes the "fiat." fellows this little aut to crack:

"There being no such thing as a dollar, it would seem to follow that the word 'dollar' would be entirely inappropriate if placed upon the new greenback. So it would be. The piece of paper might just as well be marked 'one pound, or 'one cent,' or 'one franc,' as 'one dollar.' If it is not to be redeemed in gold or silver coin, the greenback having the word 'dollar' mpon it would represent nothing valuable. It is only began to the suprement of the word's history for the scoonel of the suprement of the word's history for the scoonel of the great and community in the cause of freedom. There is a sweet door of liberty, individual liberty, for which martyrs have died and hereose contended for ages. The charter of human rights, the habeas corpus was not suspended to print this bill. No arrest without warrant or law was made. A speedy trial by jury was denied by no one. All the great rights of personal and community independence were held sacred. If government can create money out of nothing, this was the supreme moment of the world's history for the scoonplishment of so great an end.
