

# Mars Mission

Hi I'm Mike, I will be telling you about the crazy experience that happened to me, in 2050, when I was going to Mars. The speaker shouted, "Blasting of in 10,9,8,7,6,5,4,3,2,1." Underneath me I could feel an enormous rumble as we (Fred and I) blasted off. I had like a million questions buzzing in my head. They were like, are there aliens and if they did what did they use to survive and what did they eat.

When we got there I was so psyched and eager to get out as soon as possible. I unfastened my seatbelt and ran as quick as I could to the door, but of course there was a lot less gravity (only  $3.711 \text{ m/s}^2$  there is  $9.8 \text{ m/s}^2$  on Earth) on Mars so it took a lot longer to get to the front door.

When I got there I pushed the button to unlock the door. I told Fred through the radio, "Are you ready?"

Fred replied, "I'm as ready as you are." We hopped down plunging into the hard surface slowly. It was really weird. I looked around hoping to see something rare but feel a huge rumble underneath us I turned my head only to see a colossal sand storm a mile away away! I quickly turned around and ran up this humongous mountain that is called Olympus Mons and it was 3 times bigger than Mount Everest! Fred saw me running and ran in my track. When I got up I fell down a hole and so did Fred. I fell lightheaded then dozed off.

When I awakened I was tied to a steel bar that was stuck in the ground I looked around to see a space ship! It was humongous it had like 20 warships onboard. I looked out the window to see we were heading toward Earth. A creature came to me

and said a word I didn't know. He put something on my head and then said again, "who are you."

I replied, "I am from the place you are going to right now, Earth." I think the thing on my head was a translator I thought.

When we got to Earth the aliens went outside. I quickly took out a pocketknife I brought and cut the rope and broke free. I tried to find Fred, but he was nowhere to be seen. I quickly ran out the door and slowly stalked the aliens that were now talking to humans. I knew they weren't real humans because of the robotic voice, they were androids! I slowly moved toward them to hear what they were talking about. This is what I heard. Lets invade the humans tomorrow at 6:00 am we meet here tomorrow at 4:00 to get ready. Okay lets do it. They both headed different directions. I tagged along with the aliens back to their mother ship and thought if I could destroy the mother ship I could stop the attack. I turned around to see Fred with the androids. Which can only mean one thing, Fred was an android! I knew I had to stop them. I ran to the closest Halloween store and bought a alien costume and then ran home. I dressed up. I dressed up just like an alien. Now all I need is the alien language. I thought and thought until I found a microphone that can translate your voice into any voice including alien voice. Went to the store that sold them and bought it. I went to the alien mother ship and went into the control room. I saw an alien that was talking to the android leader. I looked around and saw a button that said "do not touch" in English. I carefully walked up to the sign and pulled the lever. A noise came on the overhead. I ran as fast as I could out of the ship and into the wilderness. I ran as far as my legs could take me. I heard a huge BOOM behind me a

huge airwave made me fall onto the moist dirt. I quickly got up and thought all of the aliens were died and now for the androids. I went back home and set my alarm for 3:30 in the morning.

When I woke up I quickly dressed in my alien costume and ran to the place we were going to meet. I told the androids to call off the attack, so they did. They flew up and into the air and drifted away, but not for long. An aircraft happened to be flying in the same area and shot a photon laser at the space ship and exploded in the air! I thought, well so much for them.

The next day a newspaper came in. the main article was spaceship in the air. The second article was Mike and Fred got lost in space. I forgot to go back to NASA to tell them about Fred. I quickly ran back to NASA.
